CXO Level Audit Report

Narayan Lal Gurjar (CEO)

Strategic Planning, Decision Making, RnD & Company Oversight

An independent operational review of the CEO's administrative workflows, company and governance bandwidth, data visibility and product development pipelines, and strategic policy management, prepared as part of the EF Polymer Private Limited organization-wide operational audit by Creative Upaay (brand owned by Cinnovate Solutions (OPC) Private Limited).

CLIENT	EF Polymer Private Limited
PREPARED BY	Creative Upaay
DOCUMENT VERSION	1.0
DATE ISSUED	17th July 2026
REVIEW SCOPE	CEO Level Operations

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 01 – EXECUTIVE SUMMARY

Report Overview

The Narayan Lal Gurjar (CEO) acts as the company's nerve center, responsible for strategic planning, financial oversight, and international subsidiary coordination across India, Japan, the US, and EU. While daily execution is delegated to department heads, the CEO retains final approval authority on strategic policies, budgets, and all Manager+ level of hires.

The audit revealed significant bottlenecks stemming from disconnected operational data. Extremely short forecasting runways (barely 1–2 months) severely limit manufacturing planning and global sales strategy, and the absence of a unified dashboard for finance, sales and production, forces the CEO into manual, time-consuming data collection to monitor region-wise P&L. Additionally, fragmented expense approval loops in India and MENA contrast sharply with the automated Slack-based workflows successfully pioneered by the Japan subsidiary.

Most Important Metrics / Problems for the CEO

1–2 mo FORECAST RUNWAY	5+ DIRECT CXO REPORTING	Realtime P&L VISIBILITY	1.9 / 5.0 OVERALL MATURITY SCORE
----------------------------------	-----------------------------------	-----------------------------------	--

About the Maturity Score

A 1–5 scale measuring how systematised, documented, and independently operable the department is. Scored across five dimensions: Process, Technology, Data Quality, Documentation & Knowledge Management.

1 — Ad hoc — 5 — Optimised

■ 1.9 Current state ■ 3.1 Post-roadmap target ○ 5.0 Best-in-class benchmark

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 02 — DEPARTMENT MATURITY ASSESSMENT

Department Maturity Assessment

Solid line: current state. Dashed line: target state (post-roadmap).

Operations of Narayan Lal Gurjar (CEO) scores 1.9 overall — Currently heavily reliant on unstructured data flow and manual reporting of the other CXOs. The "Technology" and "Data Quality" dimensions drag the score down due to the lack of an integrated CXO level dashboard to overwatch the progress of the company

Automating basic operational workflows (expenses/travel) and uniting financial data, real time sales and runway numbers into a live dashboard will rapidly lift the core maturity metrics.

DIMENSION	CURRENT	TARGET	GAP
Process Standardization	2.0	3.0	1.0
Technology Utilization	1.5	3.5	2.0
Data Quality & Accessibility	1.5	3.5	2.0
Documentation	2.5	3.0	0.5
Knowledge Management	2.0	2.5	0.5
Overall	1.9	3.1	1.2

SECTION 03 — CURRENT WORKFLOWS & PROCESS MAPS

Current Workflows

Manual Administrative Approvals — P-03

What is good: Workflow structure is functional and has no inherent bottlenecks. Manual CEO review is intentional and required for cost governance over senior leadership spend.

Request Scope: Approval requests reaching the CEO are strictly from C-level executives (CXOs) and Heads of Departments (HODs), rather than general executive-level staff or interns.

Point of Improvement: The manual review process can be significantly optimized. The Japan & International teams utilize a 1-click Slack bot that automatically updates trackers, logs approvals, and syncs with the reimbursement dashboard upon CEO approval. In contrast, India operations still rely on manual email approvals without automated Slack bot or dashboard integration.

Dependencies: Finance depends on forwarded email approvals from the CEO for disbursement.

Strategic Data Consolidation — P-02

What is good: Sales, Finance, and Operations teams diligently track foundational metrics in Zoho Books and Google Sheets.

Detailed Workflow Steps:

1. **Data Ingestion:** Sales and Finance teams log daily operational numbers into Zoho Books and departmental Google Sheets.
2. **Departmental Reporting:** Accounts team and direct reporting CXOs compile and submit periodic department summaries.
3. **CEO Manual Harvesting:** Narayan Lal Gurjar personally extracts, cleans, and consolidates data across disjointed departmental silos.
4. **Data Analysis & Modeling:** CEO performs manual offline analysis to track actual vs. targeted sales figures and company KPIs.
5. **Global P&L & Forecasting:** Consolidated outputs determine global P&L visibility, financial runway, and strategic growth planning.

What needs to be fixed: Lack of automated data pipelines and a centralized CXO dashboard forces the CEO into an intensive administrative harvesting role.

Bottlenecks: Manual extraction and offline spreadsheet analysis delay real-time financial and sales visibility.

Dependencies: Strategic decision-making relies entirely on manual updates and compilation from individual CXO spreadsheets.

Cross-Department Dependencies

Sales & Production

FORECAST INTEGRATION

OPERATIONS DEPENDENCY

Forecasting extension requires Sales and Production to unify their projection schedules and data methodologies. Currently, forecasting visibility is severely constrained to barely 1–2 months, risking supply chain shocks if not extended.

 **Key Persons:** Ankit Jain (Sales) / Rishabh Doshi (Production)

CRITICAL BOTTLENECK

Sales demand projections and Production scheduling currently operate independently with no shared data model. The CEO cannot bridge this gap alone.

DATA TRANSFER & UPDATES NEEDED

Sales and Production must establish a monthly forecast review cadence to validate and extend projection accuracy, feeding consolidated data directly into the CEO's dashboard.

Finance & Accounts

CXO DASHBOARD DATA

OPERATIONS DEPENDENCY

The data powering the executive CXO dashboard must be accurately maintained and tagged in Zoho Books by the Accounts team. Region-wise revenue and P&L visibility depends entirely on data quality at the Finance entry point.

 **Key Person:** Shobha Shekhawat (Finance)

CRITICAL BOTTLENECK

If Accounts data is incomplete or inconsistently tagged, the CEO dashboard will reflect inaccurate metrics, undermining strategic decision-making.

DATA TRANSFER & UPDATES NEEDED

Accounts must maintain standardized tagging conventions in Zoho Books for region, client, and expense categories. Live data feeds must be configured to pull directly into the CXO dashboard.

HR / Admin

APPROVAL WORKFLOWS

OPERATIONS DEPENDENCY

Standardized Slack-based approval workflows require company-wide adoption. HR must enforce the policy that emails/Slack DMs will no longer be valid channels for expense or travel requests.

 **Key Person:** HR Manager / Dolly Mehta

CRITICAL BOTTLENECK

Without HR enforcement, employees will continue to default to email and DM channels, recreating the very bottleneck the automated workflow is designed to eliminate.

DATA TRANSFER & UPDATES NEEDED

HR must document and communicate the new approval SOP company-wide, retiring email-based submissions within 30 days. Finance must configure disbursement triggers from the Slack workflow app.

Research & Development (R&D)

FIELD EFFICACY LOOPS

OPERATIONS DEPENDENCY

R&D must establish a structured intake and processing pipeline to receive empirical field data and farmer feedback directly for continuous polymer

CRITICAL BOTTLENECK

R&D currently lacks a structured pipeline to receive, categorize, or act upon ground-level agricultural efficacy data, slowing down product optimization.

formulation improvements.

Key Person: Ritu Parmar (R&D Lead)

DATA TRANSFER & UPDATES NEEDED

Structured field feedback (capturing crop type, region, climate, and application method) must route directly to R&D for formulation review and ongoing product iteration.

SECTION 04 — OPERATIONAL PAIN POINTS & BOTTLENECKS

Operational Pain Points

Priority Focus Areas:

- ① **Real-time Data Visibility** — No unified dashboard exists for monitoring region-wise revenue, client P&L, and expense compliance. The CEO is forced into a manual data-harvesting role across disconnected Google Sheets and departmental silos.
- ② **Forecast Extension** — An extremely short 1–2 month forecasting runway limits manufacturing planning, raw material procurement, and global sales strategy. Without consolidated data, forecasts cannot be reliably extended to 6+ months.

	PAIN POINT	IMPACT	EVIDENCE FROM AUDIT
P-01	Critical Short-Term Forecast Visibility. Projections and demand forecasting are constrained to a barely 1–2 month runway.	CRITICAL	Creates severe operational planning and raw material procurement risks for manufacturing and global sales execution.
P-02	Data Management & Real-time Visibility Gap. No single consolidated dashboard exists for monitoring region-wise revenue, client P&L, and expense compliance.	CRITICAL	CEO must conduct manual checks across disjointed Google Sheets and departmental silos, delaying strategic decisions.
P-03	Unstandardized Travel & Expense Approvals. Approvals in India and MENA are handled via unstructured email threads and DMs, whereas Japan already utilizes an automated Slack approval app. This proven workflow can be deployed to India and other regions.	MEDIUM	Manual effort and friction wasted on email approvals in India/MENA when a 1-click Slack bot solution is already operational in Japan.
P-04	Siloed Ground-Level Farmer Feedback. Agricultural usecase and crop efficacy data from the ground are not systematically aggregated.	HIGH	Missed opportunities for R&D refinement and strategic marketing messaging based on real-world farmer outcomes.

SECTION 05 — TIME & EFFORT ALLOCATION

Time & Effort Allocation

Estimated breakdown of weekly bandwidth based on workflow analysis

ACTIVITY	SHARE OF CEO TIME	EST. TIME / DAY
Strategic Planning & Corporate Policy Formulation	~25%	~2.0 hrs
External Partnerships & Investor Relations	~20%	~1.6 hrs
Financial Oversight & Performance Reviews	~20%	~1.6 hrs
Internal Coordination & Departmental Alignment	~15%	~1.2 hrs
International Expansion & Subsidiary Reporting	~12%	~58 min
High-Level Talent Approvals (Manager & above)	~8%	~38 min

This is calculated based on a standard 8-hour workday. Hours shown are estimates per the CEO's daily allocation, averaged across a typical week.

SECTION 06 — RECOMMENDED SOLUTION

Recommended Solution

This section outlines the integrated technology solution proposed to resolve operational bottlenecks, replacing the legacy recommendations register.

Implementation Required

Solution Modules to be Built:

1 Unified CXO-Level Executive Dashboard

- **Centralized CXO View:** A single executive dashboard connecting individual department views (Sales, Production, R&D, Logistics, Accounts & Hiring).
- **Integrated Data Pipelines:** Live feeds pulling from existing departmental tools—Zoho Books and updating it in custom CRM, P&L revenue models, Sales Google Sheets, and R&D logs for real-time reporting and forecasting.

2 Multi-Channel Automated Approvals

- **Multi-Channel Integrations:** Flexible approval processing via Slack apps, WhatsApp API, or directly on the CXO Dashboard.
- **Role-Based Access Control:** Automated routing of approval requests to specific CXOs or the CEO based on authority thresholds and role-based policies.

3 On-Ground Field Data Integration

- **Native Dashboard Display:** On-ground farmer feedback collected by field, sales, and R&D teams flows directly into the CRM and renders natively on the CXO Dashboard.
- **Zero Software Friction:** No standalone tools required; field efficacy metrics directly inform executive decision-making.

What Remains the Same

- **Core Financial Systems:** Financial and sales data entry remains within Zoho Books and CRM.
- **Communication Channels:** Approval workflows leverage Slack, fitting into the team's existing habits without new external software.

Tech Stack Utilized

- **Frontend:** React.js with TypeScript (Custom CXO Dashboard)
- **APIs:** Zoho Suite (CRM & Books), Slack API, WhatsApp API, Google Sheets API
- **Automation:** Custom Node.js / Python Engine (Approvals & Financial Processing)

Key Operational Problems Solved

- Secures supply chain stability and enables long-term volume negotiations with raw material vendors.
- Eliminates weekly manual data harvesting for the CEO, accelerating strategic decision making.
- Removes the CEO bottleneck on trivial approvals while ensuring a full database audit trail for Finance.
- Accelerates R&D formulation improvements based on actual field efficacy data.

Future Scope of Improvement / Enhancement

- **Company-Level RAG Knowledge Base:** Build an enterprise RAG (Retrieval-Augmented Generation) AI agent connected to a centralized database layer indexing team Google Sheets, WhatsApp communications, team Gmail accounts, and internal R&D logs to instantly answer operational queries for the CEO.
- **AI Predictive Modeling:** Integrate predictive AI algorithms to analyze global demand trends, supply chain risks, and climate variables for long-term strategic forecasting.

Next Steps for Team Adoption

- **Mandatory SOP Rollout:** Document and communicate the new approval SOP company-wide, ensuring all members use Slack rather than emails/DMs.
- **Executive Dashboard Review:** Establish a continuous feedback loop between the CEO and IT to refine dashboard views (India, MENA, P&L, etc.) until they perfectly align with daily needs.

7 — PHASED ROADMAP

Phased Roadmap

Initiatives sequenced across three phases, with quantified ROI, week-based estimates, and scope of work

INITIATIVE		PHASE 1 2–3 WKS	PHASE 2 4–6 WKS	PHASE 3 6–8 WKS
Automated Approval Workflows	Module 2	●		
Unified CXO Executive Dashboard	Module 1		●	
Forecast Integration Review	Module 1		●	
On–Ground Field Feedback & Enterprise RAG AI	Module 3			●

Phase 1 — Quick Wins: Multi-Channel Approvals

Duration: 2–3 Weeks · Low effort · High Efficiency

Maturity 1.9 → 2.2

SCOPE OF WORK & DEPENDENCIES

- **Build:** Configure automated multi-channel approval workflows (Slack apps, WhatsApp API, and CXO Dashboard) for global deployment across India, MENA, and international offices.
- **Build:** Set up role-based access control (RBAC) routing chains—CEO approval required only for Manager+ hires, major expenditures, and policy exceptions.
- **Tech Stack & Badges:** **Slack API** **WhatsApp API** **Custom Node.js Engine** . Requires HR & Finance to document approval thresholds.
- **Team Adoption:** Conduct rollout sessions to transition all employees from email/DM-based submissions to automated Slack/WhatsApp/Dashboard approval channels.
- **Client To-Do:** HR and Finance must formally retire unstructured email/DM expense submissions within 14 days and enforce the new SOP company-wide.

100%

DIGITAL AUDIT TRAIL

For all administrative approvals — no more lost email threads

Multi-Channel

SLACK & WHATSAPP

1-click approvals via Slack, WhatsApp, or CXO Dashboard

↓ 60%

CEO ADMIN LOAD

Trivial approvals no longer require manual CEO review

Phase 2 — Data Foundation: Custom CXO Dashboard

Duration: 4–6 Weeks · Medium effort · High Strategic ROI

Maturity 2.2 → 2.8

SCOPE OF WORK & DEPENDENCIES

- **Build:** Develop custom CXO-level executive dashboard connecting individual department views (Sales, Production, Logistics, R&D, Accounts & Hiring).
- **Build:** Engineer live data pipelines connecting Custom CRM, Zoho Books, P&L revenue sheets, Sales Google Sheets, and R&D logs for real-time reporting and runway forecasting.
- **Tech Stack & Badges:** **React.js + TypeScript** **Zoho APIs** **Google Sheets API** **Node.js Engine** .
- **Team Adoption:** Establish monthly forecast review cadence with Sales and Production heads to validate demand projections and extend runway visibility.
- **Client To-Do:** Finance & Accounts must maintain standardized tagging conventions in Zoho Books; Sales & Production must align projection schedules.

Live

P&L VISIBILITY

No manual data harvesting required — real-time region-wise metrics

6+ mo

FORECAST RUNWAY

Stabilizing manufacturing and raw material procurement cycles

↓ 80%

MANUAL HARVESTING

CEO no longer compiles data from scattered Google Sheets

Phase 3 — Strategic Scaling: Enterprise RAG AI Agent & Field Loops

Duration: 6–8 Weeks · High Strategic Impact

Maturity 2.8 → 3.1

SCOPE OF WORK & DEPENDENCIES

- **Build:** Deploy an enterprise RAG (Retrieval-Augmented Generation) AI agent connected to an AI database layer indexing team Google Sheets, WhatsApp communications, Gmail accounts, and R&D logs for instant CEO operational Q&A.

• Build: Integrate on-ground farmer feedback collected by field, sales, and R&D teams into the CRM to display natively on the CXO Dashboard for formulation refinement. • Tech Stack & Badges: Enterprise RAG AI Vector DB CRM Field API ReactJS + TS . • Team Adoption: Conduct CEO AI-agent onboarding to enable instant natural-language querying of company-wide performance metrics. • Client To-Do: R&D and Field teams must standardize empirical data collection fields; IT must grant read permissions for team communications indexing.		
Instant RAG AI Q&A Real-time answers on company-wide ops across all channels	Direct R&D FIELD LOOP Accelerates formulation improvements with actual efficacy data	3.1 MATURITY LEVEL Achieving a highly structured and scalable CEO office

SECTION 08 — ROI IMPACT: BEFORE & AFTER

ROI Impact: Before & After

CATEGORY	BEFORE (CURRENT STATE)	AFTER (POST-IMPLEMENTATION)
Forecast Runway	Barely 1-2 months visibility, risking supply chain shocks.	3-4+ Months Stable Visibility. Synchronized Sales and Production models.
Financial Data Consolidation	Manual harvesting across disjointed Google Sheets.	Live P&L Dashboard. Real-time region-wise metrics via Custom dashboard connected to BD & Sales Google Sheets.
Administrative Approvals	CEO bottleneck via fragmented emails and DMs.	1-Click Slack Automations. 60% reduction in CEO admin load with full audit trails.
Farmer Efficacy Feedback	No systematic capture mechanism.	Direct CRM Feedback Loop. Ground-level data directly drives R&D formulation.
Department Maturity Score	1.9 / 5.0 (Reactive)	3.1 / 5.0 (Systematised)

Quantified Executive Time Savings

Estimated annual bandwidth reclaimed for the CEO by replacing manual email/DM approval bottlenecks with 1-click automated workflows.

250 APPROVALS / MONTH	6 min AVG REVIEW TIME	25 hrs MONTHLY TIME SAVED	300 hrs ANNUAL HOURS SAVED
---------------------------------	---------------------------------	-------------------------------------	--------------------------------------

Bandwidth Reinvestment Breakdown:

- **Current Friction:** CEO processes ~250 travel/expense & policy requests monthly across India, MENA, and international entities, averaging 6 minutes per item to read email chains and request missing context.
- **Automated Efficiency:** Multi-channel Slack, WhatsApp, and CXO Dashboard integrations reduce average approval review time from 6 minutes to under 30 seconds.
- **Strategic Impact:** Reclaims **300 CEO hours per year (~37.5 full working days)**, directly shifting bandwidth toward investor relations, strategic partnerships, and global market expansion.
