Department Wise Audit Report

Business Development: B2B & RCM

Corporate Accounts, White-Label & Strategic Brokers — Jatin Jain

An independent operational review of the Business Development (B2B & RCM) vertical, assessing back-office operations, field training data capture, and inter-departmental supply chain alignment, prepared as part of the EF Polymer Private Limited organization-wide operational audit by Creative Upaay (brand owned by Cinnovate Solutions (OPC) Private Limited).

CLIENT	EF Polymer Private Limited
PREPARED BY	Creative Upaay
DOCUMENT VERSION	1.0
DATE ISSUED	17th July 2026
REVIEW SCOPE	BD — B2B & RCM (Corporate & Broker Supply)

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 01 — EXECUTIVE SUMMARY

Report Overview — B2B & RCM

The B2B & RCM vertical manages major corporate accounts and white-label agreements, anchored by RCM. Bulk raw material is supplied to a central warehouse, which RCM distributes down to ~10,000 retail stores. A secondary broker channel (Seagreen) is also managed, where EFP uniquely bears the cost of tertiary liquidation.

The audit identified three critical structural failures: a complete lack of **tertiary sales visibility** below the RCM depot tier causing inventory blind spots, **paper-based field data capture** causing transcription delays and Accounts bottlenecks, and a **90% reliance on personal WhatsApp numbers** for business comms, risking total data loss upon employee turnover. The vertical scores 1.3 maturity against a target of 3.0.

40 MT REGIONAL SALES TARGET	~10,000 RCM RETAIL STORES	~90% WHATSAPP DEPENDENCY	7 ACTIVE TEAM MEMBERS	1.3 / 5.0 OVERALL MATURITY SCORE
--	--	---------------------------------------	------------------------------------	---

About the Maturity Score

A 1–5 scale measuring how systematised, documented, and independently operable the vertical is. Scored across five dimensions: Process, Technology, Data Quality, Documentation & Knowledge Management.

1 — Ad hoc ————— 5 — Optimised

■ 1.3 Current state ■ 3.0 Post-roadmap target ○ 5.0 Best-in-class benchmark

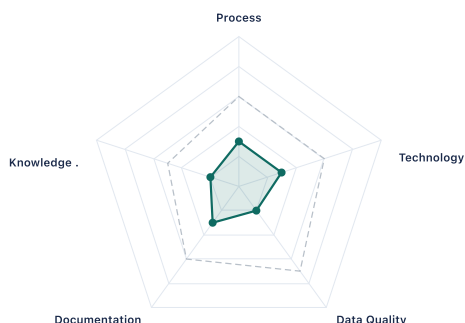

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

SECTION 02 — BENCHMARKING

Department Maturity Assessment

Solid line: current state. Dashed line: target state (post-roadmap).

B2B/RCM BD scores 1.3 overall — The lack of tertiary sales data visibility and reliance on physical paper diaries for field training drastically lowers the overall score. Additionally, relying on personal WhatsApp accounts for ~90% of business comms creates a critical Knowledge Management vulnerability.

Integrating RCM's ERP data and transitioning to company-owned WhatsApp lines will structurally stabilize the vertical without disrupting existing field habits.

DIMENSION	CURRENT	TARGET	GAP
Process Standardization	1.5	3.0	1.5
Technology Utilization	1.5	3.0	1.5
Data Quality & Accessibility	1.0	3.5	2.5
Documentation	1.5	3.0	1.5
Knowledge Management	1.0	2.5	1.5
Overall	1.3	3.0	1.7

Team Structure

Reporting hierarchy within the Company Business Unit & B2B Accounts, operating under Ankit Jain (Co-Founder & CBDO).

Tools in Use

WhatsApp (Personal Numbers)

Primary channel for B2B/RCM depot comms and farmer community groups. 90% of business relationships live here, unattached to company devices.

Physical Paper Diaries

Used by Field Team to log farmer training data, attendee counts, and QC feedback before handing over to Back Office for manual entry.

Google Sheets (Back Office)

Manual transcription target for field data. Also used to track reactive depot replenishment requests and freight dispatch statuses.

SECTION 03 — PROCESS DETAIL

Current Workflows

Where each finding sits inside the operational process

Primary Supply & Tertiary Blind Spot — P-01

What is good: The primary B2B fulfillment sequence to the central RCM warehouse is well-defined and maintains a strict 20 MT standing inventory commitment.

What needs to be fixed: EFP has zero data visibility below the RCM regional depot tier. There is no automated feed from RCM's ERP to indicate actual off-take at the ~10,000 retail stores. Additionally, lead databases are currently scattered across Google Sheets without a Unified CRM or real-time sales and receivables dashboard for leadership.

Bottlenecks: Because EFP relies on reactive 40kg depot threshold alerts rather than predictive point-of-sale data, Production and Logistics are forced into rapid, ad-hoc fulfillment cycles. Leadership lacks a single source of truth for sales done, money received, and pending receivables.

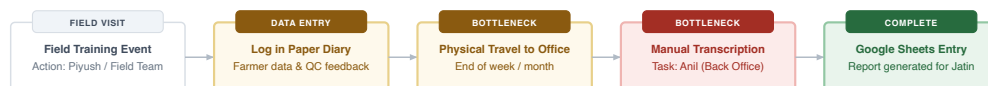

Detailed Workflow Steps:

- Order Intake & PO:** B2B orders and Purchase Orders received by Jatin Jain (AM-BD / Vertical Lead) and Anil Suthar (Back Office).
- Fulfillment & Dispatch:** Production and Logistics fulfill orders to maintain the 20 MT standing inventory commitment at the central RCM warehouse in Bhilwara.
- Depot Allocation:** RCM transfers inventory from central warehouse to regional depots.
- Tertiary Store Distribution:** ~10,000 retail stores pull inventory from regional depots.
- Data Feed & Dashboard Tracking:** RCM ERP API bridge (or backend spreadsheet update fallback) feeds tertiary off-take data into a live dashboard, while a Unified CRM tracks sales done, money received, and pending receivables in real time for Jatin, Ankit Jain (CBDO), and CXOs.

Cross-Department Involvement: **Jatin Jain (AM-BD / Vertical Lead)** (Order intake & key account strategy), **Anil Suthar (Back Office Lead)** (Invoicing & backend data updates), **Ankit Jain (CBDO)** (Executive review), **Production & Logistics** (Standing inventory fulfillment & dispatch), and **CXOs** (Live sales & receivables visibility).

Dependencies & Bottlenecks: Production and Logistics require RCM tertiary off-take data via an RCM ERP API bridge (or a backend spreadsheet update fallback when APIs are unavailable). A Unified CRM and real-time dashboard are needed to monitor sales done, money received, and pending receivables for Jatin Jain, Ankit Jain (CBDO), and CXOs.

Field Training Data & Transcription Cycle — P-02 P-03

What is good: Dedicated field team members actively capture ground-level training metrics and farmer engagement data.

What needs to be fixed: Data is captured in physical paper diaries and requires travel back to the office before manual transcription by Anil. Furthermore, travel approvals and reimbursement tracking are managed informally without a structured workflow, stalling field expense processing.

Bottlenecks: Manual transcription consumes back-office bandwidth, delays real-time visibility into field training impact, and causes payment lags for staff travel reimbursements.

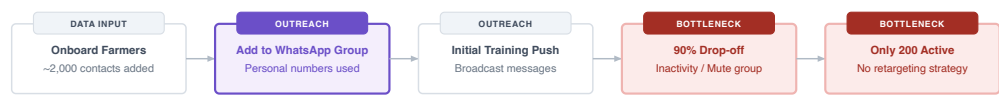

Detailed Workflow Steps:

- Field Training Event:** Piyush and field team conduct on-ground training events with farmers.
- Paper Diary Logging:** Farmer details, QC feedback, and field expenses logged manually in physical diaries.
- Travel & Office Return:** Field staff travel back to office at week or month end.
- Manual Transcription & Expense Claim:** Anil (Back Office) transcribes paper notes into Google Sheets and compiles reimbursement claims.
- Approval & Reimbursement Payout:** Accounts verifies claims and processes payouts after manual travel approval.

Cross-Department Involvement: **Piyush & Field Team** (On-ground training & diary logging), **Anil Suthar (Back Office Lead)** (Manual transcription & claim compilation), **Accounts & Finance (Shobha Shekhawat)** (Reimbursement payout), and **HR & Talent (Dolly Mehta)** (Travel approvals & attendance).

Dependencies & Bottlenecks: Travel approvals and reimbursement tracking are manual, creating delays in expense payouts. Replacing paper diaries with digital forms auto-syncing to the Unified CRM eliminates transcription time and automates reimbursement claims.

Community Engagement Funnel & Drop-off — P-04

What is good: The team has successfully built a top-of-funnel community of 2,000 farmer contacts via WhatsApp, demonstrating strong initial outreach capability.

What needs to be fixed: The funnel suffers a 90% drop-off rate. No structured retargeting, FAQ automation, or QC feedback loop exists to re-engage the 1,800 inactive contacts.

Bottlenecks: Manual broadcasting via personal WhatsApp limits scale, provides zero engagement analytics, and lacks integration with the central database.

Detailed Workflow Steps:

- 1. **Farmer Onboarding:** ~2,000 farmer contacts collected during field training events.
- 2. **Group Addition:** Contacts added manually to personal WhatsApp broadcast groups.
- 3. **Initial Broadcast:** One-way broadcast training messages sent to all members.
- 4. **Community Drop-off:** ~90% of members mute or drop off due to lack of interactive engagement.
- 5. **Active Core:** Only ~200 members remain active without automated retargeting or CRM integration.

Cross-Department Involvement: **Piyush (Field Team)** (Community management), **Anil Suthar (Back Office Lead)** (Database logging), and **Jatin Jain (AM-BD / Lead)** (Funnel review).

Dependencies & Bottlenecks: Relies entirely on Piyush and the field team manually monitoring personal WhatsApp groups without Unified CRM integration, preventing automated re-engagement or leadership dashboard tracking.

APPENDIX — CROSS-DEPARTMENT DEPENDENCIES

Cross-Department Dependencies

Findings requiring action from other departments to resolve.

Accounts & Finance

RECEIVABLES & REIMBURSEMENT TRACKING

OPERATIONS DEPENDENCY

APPROVAL FLOW

Accounts requires structured payment clearance logs, sales billing records, and travel expense reimbursement claims from the B2B & RCM vertical.

Key Person: Shobha Shekhawat (Finance Head) / Accounts Manager

CRITICAL BOTTLENECK

Manual spreadsheet tracking leaves Jatin Jain (Lead), Ankit Jain (CBDO), and CXOs without real-time visibility into total sales done, money received, and pending receivables. Paper diary transcription delays expense reporting and reimbursement payouts for field staff.

DATA TRANSFER & ACTION NEEDED

DATA FLOW

Deploy a Unified CRM hosting all spreadsheet databases alongside a real-time dashboard displaying total sales done, money received, and pending receivables directly to Jatin, Ankit Jain (CBDO), and CXOs. Connect digital field forms for automated expense verification and travel reimbursement tracking.

Production

OPERATIONAL HANDOFF & TERTIARY FEED

OPERATIONS DEPENDENCY

PLANNING DATA

Production requires predictive sales data to plan the 20 MT standing inventory flow efficiently.

Key Person: Production Lead

CRITICAL BOTTLENECK

Because BD cannot provide RCM tertiary store sales data, Production must rely on reactive 40kg depot thresholds, triggering chaotic ad-hoc manufacturing runs.

DATA TRANSFER & ACTION NEEDED

DATA FLOW

Establish an automated data feed from RCM's ERP capturing tertiary store off-take piped directly into a live dashboard shared with Production and Logistics. If RCM's ERP does not provide APIs, the fallback is to have backend spreadsheet data updated by the team to show real-time effects on the dashboard for Jatin (Lead) and CXOs.

Logistics

DISPATCH SUPPORT & SHARED DASHBOARD

OPERATIONS DEPENDENCY

INFORMATION SHARING

Requires daily coordination to manage freight delivery to RCM's Bhilwara facility and broker channels.

Key Person: Nihal Paliwal (Logistics Coordinator)

CRITICAL BOTTLENECK

Lack of predictive analytics forces rush dispatch orders, increasing freight costs and operational stress.

DATA TRANSFER & ACTION NEEDED

DATA FLOW

Logistics must be granted access to the new shared Supply Chain Dashboard powered by RCM tertiary data (or backend spreadsheet fallback) and connect a WhatsApp bot for automated tracking queries.

HR & Talent

TRAVEL APPROVALS & AVAILABILITY

OPERATIONS DEPENDENCY

APPROVAL FLOW

Field staff travel plans, attendance, and leave schedules must be authorized by HR and visible to the

CRITICAL BOTTLENECK

Travel approvals and field availability tracking are managed informally via WhatsApp without automated

Vertical Lead.

 Key Person: Dolly Mehta (HR Manager)

calendar sync, causing scheduling conflicts and approval delays.

DATA TRANSFER & ACTION NEEDED **DATA FLOW**

Integrate Google Calendar / HRMS for automated travel request approvals and real-time field staff availability tracking for HR and Jatin Jain.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 04 — OPERATIONAL PAIN POINTS

Pain Points Register

Ranked by operational impact. Each pain point is cross-referenced to its recommendation in Section 06.

Priority Focus Areas:

- ① **Supply Chain & Inventory Planning** — The total lack of tertiary sales visibility forces Production and Logistics into chaotic, ad-hoc fulfillment cycles to maintain the 20 MT commitment.
- ② **Data Security & Continuity** — Relying on personal WhatsApp numbers for 90% of comms guarantees total loss of community access and historical data upon employee turnover.

	PAIN POINT	IMPACT	EVIDENCE FROM AUDIT
P-01	Tertiary Sales Invisibility. EFP has zero data visibility below the RCM regional depot tier (i.e., the ~10,000 retail stores). No API integration with RCM's ERP.	CRITICAL	Creates a massive inventory planning blind spot; demand forecasting is purely reactive based on 40kg depot threshold alerts rather than actual point-of-sale data.
P-02	Paper-Based Field Data Capture. Field training logs and farmer data are written in physical diaries and manually transcribed into Excel by Back Office.	CRITICAL	High risk of data entry error, significant time waste, delayed billing, and holds up Accounts reimbursements for field staff.
P-03	Personal WhatsApp Data Continuity Risk. ~90% of business comms and farmer relationships are managed on personal WhatsApp numbers.	CRITICAL	Employee turnover guarantees a total loss of contact history and community access. Corporate IP is walking out the door daily.
P-04	High Community Drop-off & No Retargeting. The WhatsApp training funnel suffers a 90% drop-off rate (only 200 active out of 2,000 added).	HIGH	Lost marketing investment; no structured retargeting for inactive contacts. Manual broadcasting prevents engagement analytics.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 05 — TIME & EFFORT

Time & Effort Allocation

Estimated across all 7 active team members. Field Team (3 personnel) operates almost entirely on the ground.

ACTIVITY	SHARE OF BD TEAM TIME	EST. TIME / DAY
Field Training, Travel & Demo Execution	~40%	~3.2 hrs
Depot Supply Coordination & Logistics Sync (Prabha)	~25%	~2.0 hrs
Manual Data Transcription & Back-Office Ops (Anil)	~20%	~1.6 hrs
Community Engagement & WhatsApp Support (Piyush)	~10%	~0.8 hrs
Key Account Management & Strategy (Jatin)	~5%	~0.4 hrs

Key Observation:

Roughly **20% of total team capacity** is absorbed by manual data transcription and back-office operations—work that should be automated via digital field forms. Furthermore, the lack of tertiary sales visibility forces the Lead to spend time on reactive supply coordination rather than strategic account growth.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 06 — CORRECTIVE ACTION PLAN

Recommended Solution Segment

This section outlines the integrated technology solution proposed to resolve operational bottlenecks, replacing the legacy recommendations register. Built on the Solution Design Framework — extend existing tools, secure data on existing channels, integrate cross-departmentally.

Implementation Required

Solution Modules to be Built:

1 Unified CRM, Real-time Dashboard & RCM API

- **Unified CRM & Receivables Dashboard:** Consolidate scattered Google Sheets databases into a Unified CRM and real-time dashboard displaying sales done, money received, and pending receivables directly to Jatin Jain (Lead), Ankit Jain (CBDO), and CXOs.
- **RCM ERP API Bridge (with Fallback):** Establish an automated data feed from RCM's ERP capturing tertiary store off-take piped into a live dashboard for Production & Logistics. *Fallback:* If RCM's ERP does not provide APIs, backend spreadsheet data updated by the team will reflect in real-time on the dashboard.
- **Predictive Inventory Sync:** Replaces reactive 40kg depot alerts with actual sales trends to optimize 20 MT standing inventory commitment.

2 Digital Field Operations & Travel Approvals

- **Offline Mobile Forms:** Replace physical paper diaries with offline mobile forms (e.g., Zoho/Google Forms) auto-syncing to the Unified CRM. Zero transcription needed.
- **Travel Approvals & Reimbursements:** Automate travel authorization workflows and reimbursement tracking directly into the Accounts & HR module to eliminate payout lags.
- **WhatsApp Business API Migration:** Transition 90% of personal WhatsApp comms to Virtual Business Lines to secure company data against turnover.

3 AI WhatsApp Community Bot (Custom Build)

- **Automated FAQ & Retargeting:** Deploy a custom Gemini-powered WhatsApp bot to handle community FAQs, run automated QC feedback polls, and systematically retarget the 90% (1,800) inactive contacts.
- **Auto-Logging:** Bot interactions automatically log farmer engagement data back into the Google Sheet, providing Piyush and Jatin with real-time community health metrics without manual monitoring.

What Remains the Same

- **No New CRM:** Google Sheets remains the system of record for field data. Forms simply push data directly into it.
- **Familiar Channel:** The team and farmers continue using WhatsApp. The transition is backend (Personal → Business API), invisible to the farmer.

Tech Stack Utilized

- **Frontend:** ReactJS + TypeScript (Dashboard)
- **APIs:** RCM ERP, WhatsApp Business, Google Sheets, Zoho Forms
- **AI:** Gemini LLM (WhatsApp Bot)
- **Host:** Google Cloud Platform

Key Operational Problems Solved

- Eliminates the tertiary sales blind spot, stabilizing the 20 MT inventory flow for Production & Logistics.
- Removes 20% of manual back-office transcription time via direct-to-sheet mobile forms.
- Secures 100% of business comms and farmer data against employee turnover.
- Re-engages 1,800 inactive community contacts through automated WhatsApp retargeting.

Future Scope of Improvement / Enhancement

- **Predictive Analytics Engine:** Once tertiary RCM data is flowing, an AI layer could be added to predict seasonal demand spikes across the 10,000 stores, further optimizing Production planning. Not needed in Phase 1 but a planned future enhancement.

Next Steps for Team Adoption

- **Mandatory Training:** Field team must complete walkthrough sessions on the new mobile forms app before Phase 2 rollout.

- **Device Policy:** Formalize the transition to Virtual Business Lines; personal numbers will be phased out for business comms.
- **Feedback Loop:** Establish a continuous feedback loop with Anil (Back Office) to ensure the auto-synced Sheets match the previous manual format.

SECTION 07 — IMPLEMENTATION PLAN

Phased Roadmap

Initiatives sequenced across three phases, with quantified ROI and scope of work

INITIATIVE		PHASE 1 WEEKS 1–4	PHASE 2 WEEKS 5–9	PHASE 3 WEEKS 10–12
Supply Chain Visibility & RCM API	Module 1	●		
Digital Field Ops & WhatsApp Migration	Module 2		●	
AI WhatsApp Community Bot	Module 3			●

Phase 1 — Supply Chain Visibility

Weeks 1–4 · Cross-Dept Integration

Maturity 1.3 → 2.0

SCOPE OF WORK & DEPENDENCIES

- **Build:** Deploy Unified CRM and real-time dashboard displaying sales done, money received, and pending receivables for Jatin Jain, Ankit Jain (CBDO), and CXOs.
- **Build:** Establish RCM ERP API reporting feed to capture tertiary store off-take for Production & Logistics (with backend spreadsheet update fallback).
- **Build:** Implement travel request approvals and automated expense reimbursement tracking module.
- **Tech Stack & Badges:** **Unified CRM** **React.js Dashboard** **RCM ERP API** **Reimbursements API** .
- **Client To-Do:** Formalize data-sharing agreement with RCM; provide ERP API documentation or setup backend update team.

Predictive

INVENTORY

Stabilizes the 20 MT commitment.

Zero

RUSH ORDERS

Eliminates chaotic ad-hoc fulfillment.

Phase 2 — Digital Field Ops & Security

Weeks 5–9 · Replacing Manual Habits

Maturity 2.0 → 2.6

SCOPE OF WORK & DEPENDENCIES

- **Build:** Deploy offline-capable Zoho/Google Forms for field training data; configure auto-sync to Back Office Google Sheets.
- **Build:** Provision Virtual Business Lines (WhatsApp Business API) and migrate 2,000 farmer contacts from personal numbers.
- **Tech Stack & Badges:** **Zoho Forms API** **WhatsApp Business API** **Google Sheets API** .
- **Client To-Do:** Procure company devices/numbers for field team; formalize internal data security policy.

↓ **20%**

BACK-OFFICE TIME

Eliminates manual transcription.

100%

DATA RETENTION

Secures IP against turnover.

Phase 3 — AI Engagement & Automation

Weeks 10–12 · Scaling Community

Maturity 2.6 → 3.0

SCOPE OF WORK & DEPENDENCIES

- **Build:** Deploy a custom Gemini-powered WhatsApp bot to handle community FAQs and run QC feedback polls.
- **Build:** Automated retargeting campaign to re-engage the 1,800 inactive farmer contacts.
- **Tech Stack & Badges:** **Gemini LLM** **WhatsApp Business API** .
- **Client To-Do:** Provide Piyush's list of top 50 farmer FAQs and standard training responses.

Automated RETARGETING Scales engagement to 2,000+ contacts.	↑ 90% ACTIVE REACH Recovers lost drop-off investment.
--	--

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 08 — RETURN ON INVESTMENT (ROI)

System Impact: Before & After

Measurable improvements post-implementation

CATEGORY	BEFORE (CURRENT STATE)	AFTER (POST-IMPLEMENTATION)
Inventory Planning	Total blind spot below RCM depot. Reactive 40kg threshold alerts.	Predictive Data Flow. Live tertiary visibility from 10,000 stores directly to Production.
Field Data Capture	Paper diaries, physical travel, manual transcription by Back Office.	Offline Mobile Forms. Auto-syncs directly to Google Sheets; zero transcription.
Communication Security	90% of business comms on personal WhatsApp numbers.	Virtual Business Lines. Company-owned WhatsApp API secures 100% of data.
Community Engagement	90% drop-off rate; no retargeting; manual broadcasting.	AI WhatsApp Bot. Automated FAQs, polls, and structured retargeting for inactive users.
Accounts Reimbursement	Delayed by manual diary transcription and travel bottlenecks.	Instant Logging. Digital timestamps accelerate expense processing.
Cross-Dept Visibility	Production & Logistics forced into ad-hoc, rush fulfillment cycles.	Shared Live Dashboard. Stabilizes the 20 MT supply chain commitment.
Department Maturity Score	1.3 / 5.0 (Ad-hoc)	3.0 / 5.0 (Systematised)

Quantified Executive Time Savings

Estimated annual bandwidth reclaimed for the B2B/RCM BD Team by eliminating manual paper diary transcription and ad-hoc inventory calls.

20% BACK-OFFICE ADMIN SAVED	2,000 FARMER CONTACTS SECURED	16 hrs MONTHLY TIME SAVED	192 hrs ANNUAL HOURS SAVED
--	--	-------------------------------------	--------------------------------------

Bandwidth Reinvestment Breakdown:

- **Current Friction:** Field staff records training and sales data in physical paper diaries, requiring back-office staff to spend ~20% of their bandwidth manually transcribing notes into spreadsheets.
- **Automated Efficiency:** Offline Mobile Forms auto-sync directly to Google Sheets, while WhatsApp Business API automates community broadcasts and FAQ responses.
- **Strategic Impact:** Reclaims **192 BD/Operations hours per year (~24 full working days)** to focus on expanding RCM distributor store coverage and secondary market outreach.
