Department Wise Audit Report

Production & Manufacturing

Inventory, Procurement & Operations — Rishabh Doshi

An independent operational review of the Production department, evaluating inventory visibility, vendor management, packaging workflows, and cross-departmental data silos, prepared as part of the EF Polymer Private Limited organization-wide operational audit by Creative Upaay (brand owned by Cinnovate Solutions (OPC) Private Limited).

CLIENT	EF Polymer Private Limited
PREPARED BY	Creative Upaay
DOCUMENT VERSION	1.0
DATE ISSUED	17th July 2026
REVIEW SCOPE	Production, Warehouse, Procurement & Quality Control

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 01 — EXECUTIVE SUMMARY

Department Overview

Scope, current state, and headline findings

The Production department manages raw material procurement, manufacturing, quality control, packaging, and dispatch. Led by Rishabh Doshi, the team operates on a "Produce to Stock" model, maintaining minimum inventory thresholds of semi-finished and finished goods to fulfill sudden sales demands across domestic and international markets.

The audit identified severe data fragmentation across multiple disconnected Google Sheets. The team previously attempted to implement a custom Zoho tool, but adoption failed, forcing a reversion to manual spreadsheets. Consequently, real-time inventory visibility is non-existent for CXOs, Accounts, and Sales. Furthermore, custom packaging designs and vendor MOQs create frequent production bottlenecks and dead stock, while last-minute sales requests force unplanned labor overtime, inflating COGS without automated tracking.

5+ DISCONNECTED SHEETS	Multiple VENDOR MOQ BOTTLENECKS	Zero REAL-TIME CXO VISIBILITY	1.5 / 5.0 OVERALL MATURITY SCORE
----------------------------------	--	--	---

About the Maturity Score

A 1–5 scale measuring how systematised, documented, and independently operable the department is. Scored across five dimensions: Process, Technology, Data Quality, Documentation & Knowledge Management.

1 — Ad hoc  5 — Optimised

■ **1.5** Current state ■ **3.2** Post-roadmap target ○ **5.0** Best-in-class benchmark

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 02 — BENCHMARKING

Department Maturity Assessment

Solid line: current state. Dashed line: target state (post-roadmap).

Production scores 1.5 overall — The department struggles significantly with Technology (1.0) and Data Quality (1.0) due to failed Zoho adoption and reliance on scattered Google Sheets.

By extending their existing Google Sheets with a bi-directional React dashboard and automating alerts, the department can achieve structural visibility without forcing a disruptive platform migration.

DIMENSION	CURRENT	TARGET	GAP
Process Standardization	2.0	3.5	1.5
Technology Utilization	1.0	3.0	2.0
Data Quality & Accessibility	1.0	3.5	2.5
Documentation	1.5	3.0	1.5
Knowledge Management	1.5	3.0	1.5
Overall	1.5	3.2	1.7

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

Team Structure

Reporting hierarchy within the Production Division, led by Rishabh Doshi (Production Manager) reporting directly to Narayan Lal Gurjar (Founder & CEO).

Tools in Use

Google Sheets

Primary system of record for inventory, vendors, stock, and dispatch (reverted from Zoho)

Google Drive

Manual storage for vendor documents, gate passes, and QC reports

WhatsApp

Primary internal communication channel for operations and cross-team coordination

Slack & Email

Communication for international teams, external auditors, and compliance

Zoho (Abandoned)

Custom WMS built previously but failed adoption; operations reverted to Sheets

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 03 — PROCESS DETAIL

Current Workflows

Where each finding sits inside the operational process

Core Fulfillment & Inventory Lifecycle

What is good: The "Produce to Stock" model using Semi-Finished Goods (SFG) allows rapid fulfillment once sales orders arrive.

What needs to be fixed: Inventory levels across all stages are tracked in disconnected Google Sheets. Real-time visibility is lost.

Bottlenecks: Last-minute sales triggers often force labor overtime, adding uncalculated COGS to the product cycle.

Dependencies: Production relies on BD/Sales for forecasting, which is currently erratic, preventing proactive inventory maintenance.

Custom Packaging Design & MOQ Friction — P-02 P-05

What is good: There is a structured loop from design to client approval before production begins.

What needs to be fixed: The entire workflow runs on WhatsApp/Email. If the order quantity is less than the vendor MOQ, production must manually reconcile pricing or wait to combine orders, causing delays.

Bottlenecks: Manual revisions and physical vendor outreach for every custom design.

Dependencies: Production is entirely dependent on the BD team and Marketing designer to finalize and approve designs before ordering packaging.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

Multi-Sheet Inventory Data Flow & CXO Reporting — P-01 P-03

What is good: The department maintains detailed trackers for every operational stage and vendor.

What needs to be fixed: Data is siloed across 5+ disconnected Google Sheets. There is no automated aggregation.

Bottlenecks: Rishabh is the sole consolidation point. Manual aggregation delays CXO visibility until month-end.

Dependencies: Accounts and Sales are dependent on Production's manual exports to calculate COGS and dispatch status.

Quality Control & Cross-Verification Flow — P-04

What is good: Three distinct layers of checking (QC, QA, QI) ensure batch integrity and product quality across raw, in-process, and packaging stages.

What needs to be fixed: Cross-verification is done manually across multiple team members with no single platform to maintain a record of who verified what.

Bottlenecks: Critical-tier checks have no automated audit trail. Documents are scattered across Drive and Sheets.

Dependencies: Dispatch is entirely dependent on manual sign-offs, risking compliance during external audits.

APPENDIX

Cross-Department Dependencies

Findings and recommendations that require action outside the Production Office to resolve

Sales & Business Development

COMMERCIAL SUPPORT

OPERATIONS DEPENDENCY

Production heavily depends on Sales for advance forecasting to maintain minimum inventory. Sales depends on Production for dispatch readiness.

 Key Person: Sales Head / BD Lead

CRITICAL BOTTLENECK

Last-minute sales orders force unplanned labor overtime, inflating COGS. Custom packaging requests are sent without volume commitments, triggering MOQ dead stock.

DATA TRANSFER & UPDATES NEEDED

Sales must adopt a unified intake format for custom designs. AI forecasting will pull historical sales data to generate seasonal predictions, allowing Production to maintain stock without manual cross-team chasing.

Accounts & Finance

ADMIN & BUDGET SUPPORT

OPERATIONS DEPENDENCY

Production requires Accounts for vendor payments, invoicing, and e-challans. Accounts requires Production for dispatch notes and stock valuation.

 Key Persons: Accounts Team

CRITICAL BOTTLENECK

Vendor documents (GST, PAN) are collected manually via WhatsApp/Drive and re-uploaded for Accounts. Overtime costs are not automatically calculated and pushed to Accounts for COGS.

DATA TRANSFER & UPDATES NEEDED

A vendor onboarding form will automatically dispatch verified documents to Accounts. Overtime calculations will be computed automatically and synced to the Accounts ledger.

CXO & Management

EXECUTIVE VISIBILITY

OPERATIONS DEPENDENCY

CXOs (Narayan Sir) rely on Rishabh Doshi for top-down visibility into production capacity, inventory status, and major machinery investments.

 **Key Person: Rishabh Doshi**

CRITICAL BOTTLENECK

CXOs wait for end-of-month manual reports to see dispatch and production metrics. No real-time view of WIP, raw materials, or dead stock exists.

DATA TRANSFER & UPDATES NEEDED

The new Production Dashboard will provide role-based, 1-click visibility to CXOs directly from Google Sheets in real-time, eliminating the manual reporting cycle.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED**CIN : U62099RJ2025OPC100267****SECTION 04 — OPERATIONAL PAIN POINTS**

Pain Points Register

Ranked by operational impact. Each pain point is cross-referenced to its recommendation in Section 06.

Priority Focus Areas:

- ① **Inventory Visibility & Data Silos** — The most pressing gap is the lack of real-time visibility. 5+ disconnected Google Sheets prevent CXOs and Accounts from seeing stock levels, forcing manual end-of-month aggregation.
- ② **Custom Packaging & Vendor MOQ Friction** — Manual vendor sourcing and MOQ mismatches cause dead stock, while design approvals get lost in WhatsApp threads.

	PAIN POINT	IMPACT	EVIDENCE FROM AUDIT
P-01	Scattered Inventory Data & No Real-Time Visibility. Raw material, SFG, and finished goods are tracked across 5+ disconnected Google Sheets. Zoho WMS was abandoned.	CRITICAL	CXOs and Accounts wait for month-end manual reports. No live view of stock availability or dispatch status.
P-02	Custom Packaging MOQ & Vendor Sourcing Friction. Custom design requests trigger vendor MOQ mismatches. Vendors are stored in scattered sheets with no central directory.	CRITICAL	Production manually calls vendors for quotes. Low MOQ orders are delayed while waiting to combine them, creating dead stock surplus.
P-03	Unpredictable Sales Forecasting & Overtime Cost Bleed. Last-minute sales orders force unplanned labor overtime. Overtime costs are not systematically calculated or added to COGS.	CRITICAL	Sales is seasonal but forecasting relies on manual BD communication rather than historical data, leading to rushed production and untracked expense inflation.
P-04	Manual Quality Control & Cross-Verification Tracking. Multiple team members cross-verify QC/QI/QA, but records are maintained manually across Drive and Sheets.	HIGH	No single platform exists to track who verified what. Increases compliance risk during external audits.
P-05	Fractured Packaging Design Approval Workflow. BD receives client requests, designer drafts them, and approvals happen over WhatsApp/Email with no unified tracking link.	HIGH	Revisions are hard to track. Production waits for final approval and quantity notification before dispatching the print order to the vendor.
P-06	Disconnected Vendor Onboarding & Document Collection. Vendor documents (GST, PAN, bank details) are collected via WhatsApp/Drive and manually shared with Accounts.	MEDIUM	Creates data silos and manual transcription errors between Production's vendor list and Accounts' master ledger.

SECTION 05 — TIME & EFFORT

Time & Effort Allocation

Based on a standard 8-hour workday. Hours shown are estimates per team member per day, averaged across the team.

ACTIVITY	SHARE OF TEAM TIME	EST. TIME / DAY
Manufacturing & Floor Operations	~30%	~2.4 hrs
Inventory & Sheet Reconciliation (Manual)	~20%	~1.6 hrs
Vendor Sourcing & MOQ Negotiation	~20%	~1.6 hrs
Quality Control (QC/QA) & Verifications	~15%	~1.2 hrs
CXO Reporting & Cross-Dept Coordination	~15%	~1.2 hrs

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

SECTION 06 — CORRECTIVE ACTION PLAN

Recommended Solution Segment

This section outlines the integrated technology solution proposed to resolve operational bottlenecks, replacing the legacy recommendations register.

Implementation Required

Solution Modules to be Built:

1 Unified Inventory Dashboard

- **Real-Time Data Sync:** The dashboard links directly to your existing Google Sheets. If someone edits a Google Sheet, the dashboard updates instantly. If you make a change on the dashboard, it automatically saves back to the Google Sheet, meaning no data is ever out of sync.
- **Stock & WIP Visibility:** A clear, visual breakdown of raw materials, semi-finished goods (SFG), and fully processed goods ready to dispatch. Red alerts will flag expiring materials, wastage, or minimum inventory breaches.
- **CXO & Accounts Access:** Role-based visibility allows CXOs to view production metrics in real-time and Accounts to access dispatch/invoice data without waiting for month-end reports.

2 AI & Smart Procurement Engine

- **Vendor Directory & MOQ Optimizer:** Centralizes the scattered vendor sheets into a searchable directory. When a custom order comes in, AI automatically matches the quantity to vendor MOQs, suggesting the best pricing or identifying if orders should be combined.
- **Overtime & COGS Calculator:** An automated tool that calculates labor overtime triggered by last-minute sales and directly syncs this additional cost to the Accounts team for accurate COGS calculation.

3 Automated Comms & Design Approvals

- **WhatsApp Agent Integration:** Keeps the team on their preferred channel. Automated alerts for low inventory, QC verification requests, and dispatch approvals.
- **Unified Design Link:** A single platform link for BD, the designer, and the client to approve custom packaging. Revisions auto-notify Production, who then trigger the vendor dispatch with one click.
- **Vendor Onboarding Forms:** Self-serve forms for new vendors to upload GST/PAN/docs, which automatically route to the Accounts team for verification.

What Remains the Same

- **No New Backend Database:** Google Sheets and Drive remain the core sources.
- **Familiar Workflows:** The team can still update sheets manually without being forced to change underlying habits.

Tech Stack Utilized

- **Frontend:** ReactJS + TypeScript
- **APIs:** Google Sheets, Drive, WhatsApp Business
- **AI:** Gemini/LLMs for Forecasting & Vendor Matching
- **Host:** Google Cloud Platform

Key Operational Problems Solved

- Eliminates manual end-of-month reporting and provides real-time stock visibility.
- Resolves custom packaging MOQ bottlenecks by intelligently matching orders to vendors.
- Automates overtime calculation, ensuring accurate COGS accounting.

- Provides a single traceable link for design approvals and QC verifications.

Future Scope of Improvement / Enhancement

- **AI Sales Forecasting Agent:** In the future, an AI agent could actively analyze historical seasonal sales data and current BD pipelines to generate highly accurate 90-day production forecasts, proactively maintaining minimum inventory levels.

Next Steps for Team Adoption

- **Mandatory Training:** Team adoption and training sessions must be made compulsory to ensure all team members understand how to use the dashboard and AI tools.
- **Feedback Loop:** Establish a continuous feedback loop to iterate on the solution on the ground, ensuring it genuinely adapts to the team's operational reality and achieves actual adoption.

SECTION 07 — IMPLEMENTATION PLAN

Phased Roadmap

Initiatives sequenced across three phases, with quantified ROI and scope of work

INITIATIVE		PHASE 1 WEEKS 1–4	PHASE 2 WEEKS 5–9	PHASE 3 WEEKS 10–12
Unified Inventory Dashboard & Sync	Module 1	●		
AI Procurement & COGS Engine	Module 2		●	
Automated Comms & Approvals	Module 3			●

Phase 1 — Core Infrastructure & Dashboard

Maturity 1.5 → 2.5

Weeks 1–4 · Centralizing Data & Workflows

SCOPE OF WORK & DEPENDENCIES

- **Build:** Connect existing Google Sheets (Raw, SFG, Packaging, QC) to a new ReactJS Dashboard with Bi-Directional sync.
- **Build:** Implement role-based visibility for CXOs, Accounts, and Production managers. Configure red alerts for minimum inventory breaches.
- **Tech Stack & Badges:** **React.js Dashboard** **Google Sheets API** .
- **Team Adoption:** Conduct initial walkthrough sessions for the Production team to navigate the new UI.
- **Client To-Do:** Provide read/write API access to the Google Workspace and map out the exact approval hierarchy.

100%

DATA SYNC

Eliminates manual copy-pasting across disparate sheets.

Live

CXO VISIBILITY

Instant visibility into WIP and stock without month-end delays.

Automated

INVENTORY ALERTS

Proactive flags for low stock and expiring materials.

Phase 2 — AI & Smart Procurement

Maturity 2.5 → 2.9

Weeks 5–9 · Automating Sourcing & Costs

SCOPE OF WORK & DEPENDENCIES

- **Build:** Deploy Vendor Directory with AI MOQ matching to find best pricing or suggest combining orders.
- **Build:** Overtime & COGS Calculator that syncs labor shift data directly to Accounts for accurate product costing.
- **Tech Stack & Badges:** **Gemini LLM** **Google Sheets API** .
- **Team Adoption:** Train Procurement head (Arshid) on utilizing the smart directory for quotations.
- **Client To-Do:** Consolidate all existing vendor lists and historical pricing sheets for AI grounding.

↓ **Dead Stock**
MOQ OPTIMIZATION

AI matches orders to prevent surplus inventory.

Accurate
COGS MARGINS

Overtime costs automatically factored into product cost.

Speed
VENDOR SOURCING

Instant directory lookup replaces manual WhatsApp calls.

Phase 3 — Automated Comms & Approvals

Maturity 2.9 → 3.2

SCOPE OF WORK & DEPENDENCIES

- **Build:** Integrate WhatsApp Business API for low inventory alerts, QC verification requests, and dispatch approvals.
- **Build:** Unified Design Approval link connecting BD, Designer, Client, and Production. Vendor onboarding self-serve forms.
- **Tech Stack & Badges:** **WhatsApp Business API** **LangGraph Workflows** .
- **Team Adoption:** Establish a continuous feedback loop on the ground to iterate and sustain adoption.
- **Client To-Do:** Provide individual team member roadmaps, platform preferences, and contact details for API mapping.

Zero LOST APPROVALS Single link tracks all design revisions and sign-offs.	Automated VENDOR ONBOARDING Docs auto-route to Accounts, eliminating manual Drive uploads.	Sustained USAGE Feedback loop ensures the solution adapts to reality.
--	--	---

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 08 — RETURN ON INVESTMENT (ROI)

System Impact: Before & After

Measurable improvements post-implementation

CATEGORY	BEFORE (CURRENT STATE)	AFTER (POST-IMPLEMENTATION)
Inventory Tracking & Storage	5+ scattered Google Sheets. Abandoned Zoho WMS. High risk of data loss.	1 Centralised Dashboard. Real-time bi-directional sync (Single Source of Truth).
Vendor Sourcing & MOQ	Manual calls to scattered vendors. Surplus dead stock from MOQ mismatches.	Smart Procurement Engine. AI matches orders to vendor MOQs to find best pricing and combine orders.
CXO & Accounts Visibility	Manual end-of-month aggregation by Rishabh Doshi.	Real-Time Role-Based Access. Instant visibility into WIP, stock, and COGS for CXOs/Accounts.
Quality Control Verification	Manual sign-offs scattered across Drive and Sheets.	Automated Status Sync. Live tracking of multi-member QC verifications on a single platform.
Custom Packaging Approvals	Lost in WhatsApp/Email threads between BD, Client, and Designer.	Unified Design Link. One-click approvals and automated vendor dispatch upon confirmation.
COGS & Overtime Calculation	Overtime costs untracked, inflating actual product margins silently.	Automated COGS Sync. Labor overtime calculated and pushed to Accounts instantly.
Department Maturity Score	1.5 / 5.0 (Ad-hoc)	3.2 / 5.0 (Systematised)

Quantified Executive Time Savings

Estimated annual bandwidth reclaimed for the Production Manager (Rishabh Doshi & team) by eliminating manual inventory reconciliation and stock checks.

1.6 hrs/day INVENTORY RECON SAVED	100% REAL-TIME WIP SYNC	32 hrs MONTHLY TIME SAVED	384 hrs ANNUAL HOURS SAVED
--	-----------------------------------	-------------------------------------	--------------------------------------

Bandwidth Reinvestment Breakdown:

- **Current Friction:** Production team spends ~1.6 hours daily manually cross-checking raw, SFG, and packaging Google Sheets with Accounts and Logistics.
- **Automated Efficiency:** Unified Inventory Dashboard bi-directionally syncs with Sheets, giving real-time WIP and stock levels without manual copy-pasting.

- **Strategic Impact:** Reclaims **384 Production hours per year (~48 full working days)** to focus on manufacturing yield optimization, factory QA governance, and plant scaling.
