Department Wise Audit Report

Human Resources

Recruitment, Performance Management, Admin & Employee Lifecycle

An independent operational review of the Human Resources department, evaluating fragmented recruitment pipelines, manual performance management workflows, admin ticket-tracking gaps, and policy-query bottlenecks, prepared as part of the EF Polymer Private Limited organization-wide operational audit by Creative Upaay (brand owned by Cinnovate Solutions (OPC) Private Limited).

CLIENT	EF Polymer Private Limited
PREPARED BY	Creative Upaay
DOCUMENT VERSION	1.0
DATE ISSUED	17th July 2026
REVIEW SCOPE	HR, Recruitment, PMS, Admin & L&D

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 01 — EXECUTIVE SUMMARY

Department Overview

Scope, current state, and headline findings

The Human Resources department comprises five team members across three verticals — Hiring, Admin, and HR/PMS — governing the entire employee lifecycle from strategic recruitment and onboarding to performance evaluation, payroll, and offboarding.

The audit revealed a heavily manual, disconnected ecosystem. Recruitment sourcing spans six+ platforms (LinkedIn, Naukri, Indeed, Apollo, SalesIQ, and external GPT/Perplexity for contact scraping) with no unified tracking layer, creating a complete blind spot for leadership. Performance management relies on scattered Google Sheets for KPI/KRA tracking, preventing automation of incentives and forcing subjective annual appraisals. Admin support tickets are raised on WhatsApp and email with zero live tracking. Policy queries — especially from the BD and Sales teams regarding travel, stays, and reimbursements — consume significant HR bandwidth with no self-serve mechanism.

OVERALL MATURITY
SCORE

About the Maturity Score

A 1–5 scale measuring how systematised, documented, and independently operable the department is. Scored across five dimensions: Process, Technology, Data Quality, Documentation & Knowledge Management.

1 — Ad hoc  5 — Optimised

■ **1.6** Current state ■ **3.4** Post-roadmap target ○ **5.0** Best-in-class benchmark

CIN : U62099RJ2025OPC100267

SECTION 02 — BENCHMARKING

Department Maturity Assessment

Solid line: current state. Dashed line: target state (post-roadmap).

HR scores 1.6 overall — The department has foundational systems (Zoho People, Zoho Payroll) but they serve only 20 paid seats. Temporary employees, KPI/KRA tracking, recruitment pipelines, and admin tickets all live in disconnected Google Sheets and WhatsApp threads. Knowledge Management scores 1.0 because there is no self-serve policy query mechanism and no centralised candidate database for re-hiring.

Wrapping intelligence (visibility, AI pre-screening, WhatsApp-based policy assistant) around existing tools will structurally stabilise the department without forcing a platform migration.

DIMENSION	CURRENT	TARGET	GAP
Process Standardization	2.0	3.5	1.5
Technology Utilization	1.5	3.5	2.0
Data Quality & Accessibility	1.5	3.5	2.0
Documentation	2.0	3.5	1.5
Knowledge Management	1.0	3.0	2.0
Overall	1.6	3.4	1.8

SECTION 03 — ORGANIZATION

Team Structure & Tools

Personnel breakdown and core technology mapping

Team Structure

Reporting hierarchy within Human Resources, operating under Puran Singh Rajput (Co-Founder & COO).

Tools in Use

Zoho People (Zia)

Employee records, attendance & policy compliance — limited to 20 paid seats only

Zoho Payroll

Salary disbursement & payroll compliance for on-payroll employees only

Google Sheets

Temp employee tracking, KPI/KRA, hiring pipeline, referrals — 5+ disconnected trackers

Google Drive

Policy documents, contracts, signed NDAs & offer letters — no directory structure

WhatsApp

Primary comms channel — admin tickets, field attendance locations, referral tracking

LinkedIn

Candidate sourcing and professional networking.

Naukri

Active candidate sourcing.

Indeed

Job postings and candidate sourcing.

Apollo AI

Contact scraping for passive candidates.

SalesIQ

Contact scraping and lead intelligence.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 03 — PROCESS DETAIL

Current Workflows

Where each finding sits inside the operational process

Recruitment Sourcing & Screening Cycle — H-01 H-02

What is good: Multi-platform sourcing ensures wide candidate reach. CXO involvement in priority assignment ensures strategic alignment for hiring.

What needs to be fixed: No unified platform to track all candidates. HR must switch between 6+ platforms to check status. Contact details are scraped using external GPT/Perplexity — no integrated scraping layer. No AI pre-screening — every profile is manually reviewed at 10 minutes each.

Bottlenecks: 30-40 profiles screened per day manually. 22-25 candidates scraped per day. Average closing rate of 30-45 days per opening. Previously screened candidates from unclosed roles cannot be re-tracked for similar future openings.

Dependencies: Department heads must provide JDs, salary, working hours, and specific requirements. CXOs assign priority order. External platforms control candidate flow.

Interview & Selection Process — H-01 H-06

What is good: Structured cultural fit checklist exists. 0-5 rating system by all stakeholders (technical heads, department heads, HR). 3-4 round structure with assignment add-ons is well-defined.

What needs to be fixed: All ratings tracked on Google Sheets with no centralized portal. Hiring rounds should be customizable per role but currently follow a rigid template. Offer letters and NDAs are manually customized per candidate with no AI-assisted drafting.

Bottlenecks: Manual compilation of 0-5 ratings from multiple stakeholders. Email-based offer letter approval with no audit trail. No e-signature workflow.

Dependencies: HODs/TLs must conduct technical interviews and submit ratings. CXOs must conduct final interviews for HOD+ roles. No system enforces SLA on any step.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

Onboarding & Document Management — H-06

What is good: Onboarding process is documented on Google Docs. Documents are templated at a base level. All files stored on Google Drive.

What needs to be fixed: No automated reminders to internal teams or candidates for upcoming joinings. No dashboard reminder for HR. Offer letters and NDAs manually customized per candidate discussion. No e-signature platform. No document directory — files scattered on Drive with no single source of truth for retrieval.

Bottlenecks: When hiring happens mid-month with joining at month start, manual coordination creates gaps. Document retrieval for any team member requires manual Drive searching. No tracking of which documents are signed vs pending.

Dependencies: HR executive manages onboarding. IT must provision accounts. Department heads must conduct induction. No system orchestrates these handoffs.

Performance Management System (PMS) — H-04

What is good: KPI/KRA framework exists. Multi-level review process (Manager → HR → CXO) is structured. HOD-level reviews involve CXOs directly.

What needs to be fixed: Not on software — entirely on Google Sheets. Cannot automate incentive calculations. Annual frequency delays feedback loops. Appraisals are subjective, decoupled from real-time operational data (sales targets, QC metrics).

Bottlenecks: Manual compilation of KPI/KRA data from multiple sheets. No link between performance scores and incentive calculation. Probation reviews (3-month) are manual with no automated trigger.

Dependencies: Reporting managers must verify KPI/KRA data. CXOs must review HOD performance. Finance must reconcile incentive payouts. No system connects these stakeholders automatically.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

Admin Support & Policy Query Resolution — H-03 H-05

What is good: WhatsApp provides a quick, familiar communication channel for the ground team. Budget approval slabs are defined in policy documents.

What needs to be fixed: No ticket tracking system — admin has no live visibility of open, closed, or pending tickets. Budget approvals are lost in email threads with no audit trail. Policy queries from BD/Sales (travel, stays, reimbursements) consume HR bandwidth with no self-serve mechanism. No system to flag when a query falls outside existing policy coverage.

Bottlenecks: Issues get lost in WhatsApp message threads. HR time is consumed answering repetitive policy questions. Budget approval routing is manual — no slab-based auto-routing despite slabs being defined in policy.

Dependencies: Admin team resolves tickets manually. HR answers all policy queries. CXOs approve budgets via email. No system connects these workflows or provides visibility.

Field Attendance & Temp Employee Tracking — H-09

What is good: WhatsApp location sharing provides a basic attendance signal from field staff without requiring a new app.

What needs to be fixed: Previous live-tracking software failed. Temp employees are excluded from Zoho People to avoid per-head billing costs. HR manually enters WhatsApp location data into Google Sheets. No live attendance dashboard for field teams.

Bottlenecks: Manual data entry from WhatsApp to Sheets is error-prone and time-consuming. No real-time visibility into field team attendance. Monthly reconciliation is manual.

Dependencies: Field staff must share locations on WhatsApp. HR must manually transcribe. No automated pipeline exists between WhatsApp location shares and the attendance sheet.

APPENDIX

Cross-Department Dependencies

Findings and recommendations that require action outside the HR department to resolve

All Department Heads / Team Leads

HIRING & L&D PARTNERS

OPERATIONS DEPENDENCY

Department heads submit "Person Required Forms" with JDs, salary, working hours, and specific requirements. They conduct technical interviews and provide L&D feedback. Cultural fit and 0–5 ratings depend on their timely input.

All HODs / Team Leads

CRITICAL BOTTLENECK

Manual forms via email, unstructured interview feedback on Google Sheets, and verbal L&D requests create delays and data loss in the hiring and training pipelines.

DATA TRANSFER & UPDATES NEEDED

Need a digital intake portal for hiring requisitions. Interview scoring must move from Sheets to a centralized dashboard. L&D training requests must be submitted through a structured portal, not collected verbally.

COO / CXO Office

STRATEGY & APPROVALS

OPERATIONS DEPENDENCY

CXOs align hiring strategy, assign position priorities, conduct final interviews for HOD+ roles, approve offer letters via email, and manage annual PMS for direct reports. Budget approvals follow fixed slabs but are routed manually. CXOs / COO

CRITICAL BOTTLENECK

Offer letter approvals get lost in email threads. No visibility into hiring pipeline progress against Q4 targets. Budget approvals have no automated slab-based routing despite policy definitions.

DATA TRANSFER & UPDATES NEEDED

Need dashboard visibility into active hiring pipeline and budget utilization. Offer letter approvals must be routed through a digital workflow with audit trails. Budget slab-based auto-routing must replace manual email chains.

Finance & Accounts

PAYROLL & VENDOR OVERLAP

OPERATIONS DEPENDENCY

Monthly department budget is given by Accounts to CXOs, approved, then shared with HR/Admin. Payroll reconciliation requires manual data verification between Zoho People, Zoho Payroll, and Finance records. Vendor management is common to both HR and Accounts. Finance Team

CRITICAL BOTTLENECK

Manual payroll verification across systems. No integrated budget tracking. Vendor management is untracked entirely — identified as low priority but shared gap.

DATA TRANSFER & UPDATES NEEDED

Payroll data from Zoho Payroll must sync automatically with Finance systems. Budget approval workflow must be visible to both HR and Finance. Vendor management (low priority) should eventually be a shared module.

BD / Sales & International Team

POLICY CONSUMERS

OPERATIONS DEPENDENCY

BD/Sales teams are the heaviest consumers of travel, stay, and reimbursement policies. They frequently raise policy queries. International team uses Slack (not WhatsApp) for communication. Field staff share attendance via WhatsApp locations.

 BD/Sales Head · International POCs

CRITICAL BOTTLENECK

No self-serve policy query system — all questions routed to HR directly. Travel reimbursement tracking is manual on Zoho with no query management. Communication channels differ (WhatsApp vs Slack) creating fragmented workflows.

DATA TRANSFER & UPDATES NEEDED

WhatsApp policy chatbot must also support Slack for international team. Reimbursement queries should be answerable via the AI assistant. Field attendance location data from WhatsApp must auto-sync to attendance Sheets.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 04 — OPERATIONAL PAIN POINTS

Pain Points Register

Ranked by operational impact. Each pain point is cross-referenced to its recommendation in Section 06.

Priority Focus Areas:

- ① **Admin Visibility & Employee Engagement** — The client's stated first priority. No live tracking of support tickets, budget approvals, or engagement activities. All managed on WhatsApp/email with zero visibility.
- ② **Unified Recruitment Pipeline** — Sourcing across 6+ platforms with no centralized tracking. 30–45 day closing rate. No AI pre-screening. Previously screened candidates cannot be re-engaged for similar roles.

PAIN POINT	IMPACT	EVIDENCE FROM AUDIT
H-01 No Unified Recruitment Tracking. Sourcing spans LinkedIn, Naukri, Indeed, Apollo, SalesIQ, and external GPT/Perplexity for contact scraping — all tracked on disconnected Google Sheets with no centralized pipeline.	CRITICAL	HR must switch between 6+ platforms to check candidate status. Leadership has zero dashboard visibility. 30–45 day closing rate per opening.
H-02 Manual Pre-Screening & No AI Layer. Every candidate profile is manually reviewed at ~10 minutes each. No software pre-screens against JD criteria. 30–40 profiles screened per day, 22–25 scraped per day.	CRITICAL	HR confirmed sourcing is the single largest time sink. No parameter-based AI screening exists. Candidate database from unclosed roles cannot be re-searched for future similar openings.
H-03 No Admin Ticket Tracking or Budget Approval Workflow. Internal support tickets raised on WhatsApp/email with no live tracking. Budget approvals lost in email threads despite fixed slab definitions in policy.	CRITICAL	Client stated admin and employee engagement as #1 priority to build. No visibility of open/closed/pending tickets. Budget slab-based routing is defined but not digitized.
H-04 Subjective & Manual Performance Management. KPI/KRA tracked on Google Sheets. Appraisals are annual and subjective. Cannot automate incentive calculations. Decoupled from real-time operational data.	HIGH	HR confirmed PMS "is not on software" and they "can't incentivize this and automate this right now." Manager → HR → CXO workflow is entirely manual.
H-05 No Policy Query Management System. Team members — especially BD/Sales — ask HR directly about travel, stay, and reimbursement policies. No self-serve chatbot or knowledge base. Policy updates not proactively communicated.	HIGH	Client explicitly requested a "custom AI chatbot or query management thing." Policies updated quarterly/half-yearly but no system notifies or educates team members on changes.
H-06 Fragmented Onboarding & Document Management. Onboarding process on Google Docs. Offer letters and NDAs manually customized. No e-signature platform. No document directory. No automated reminders to internal teams or candidates.	HIGH	HR confirmed "there is no directory of management of their documents." Mid-month hires with start-of-month joinings create coordination gaps with no automated reminders.

H-07	Untracked Employee Referrals & No Feedback System. Referrals tracked on WhatsApp, email, and Google Sheets with no formal system. No anonymous feedback/grievance mechanism — team members hesitate to raise concerns directly to HR.	MEDIUM	Client confirmed "there is no tracking" for referrals. Also requested a feedback form "which could be anonymous and maybe only visible to certain team members."
H-08	Ad-hoc L&D Infrastructure & No Skills Matrix. Training needs collected manually/verbally. No centralized request portal. No skills directory ("who knows what"). No polling for Saturday team activities. No LMS for induction or prerequisite assets.	MEDIUM	HR confirmed "no specific one platform or one dashboard where they can see what kind of demands are coming in." Induction training covers 11 team members but has no digital asset management.
H-09	Field Attendance Tracking Failure for Temp Employees. Previous live-tracking software failed. Temp employees excluded from Zoho People (cost). Now using WhatsApp location shares manually transcribed into Google Sheets.	MEDIUM	HR confirmed "they have tried using a software for attendance live tracking... but it has not worked and it is currently being used on WhatsApp locations." Manual entry is error-prone.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 05 — TIME & EFFORT

Time & Effort Allocation

Based on a standard 8-hour workday. Hours shown are estimates per team member per day, averaged across the 5-person team.

ACTIVITY	SHARE OF TEAM TIME	EST. TIME / DAY
Recruitment Sourcing, Scraping & Screening	~40%	~3.2 hrs
Admin Support & Ticket Resolution (WhatsApp/Email)	~20%	~1.6 hrs
Onboarding, Document Management & Policy Admin	~15%	~1.2 hrs
Performance Management (KPI/KRA Tracking & Appraisals)	~15%	~1.2 hrs
L&D Operations & Employee Engagement	~10%	~48 min

Key Insight: Over 60% of HR capacity is consumed by manual recruitment logistics (sourcing across 6+ platforms, screening 30–40 profiles/day at 10 min each) and unstructured admin support on WhatsApp/email. Transitioning to a unified ATS dashboard with AI pre-screening and a WhatsApp-integrated ticketing system is essential to shift focus towards strategic talent development and data-driven performance management.

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 06 — CORRECTIVE ACTION PLAN

Recommended Solution Segment

This section outlines the integrated technology solution proposed to resolve operational bottlenecks, following the extend-don't-replace principle.

Implementation Required

Solution Modules to be Built:

1 Unified Recruitment Dashboard & Onboarding Engine

- **Centralized ATS Layer:** Connects to LinkedIn, Naukri, Indeed, Apollo, and SalesIQ via APIs. HR continues using these platforms — the dashboard sits on top as a unified tracking layer. No platform switching required.
- **AI Pre-Screening Agent:** A Gemini-powered agent that matches candidate profiles against JD parameters and prerequisite questions. Replaces the manual 10-minute-per-profile screening with automated first-layer filtering.
- **Candidate Re-Engagement Database:** Previously screened candidates from unclosed roles are indexed. When a similar role opens, the system suggests past candidates who may be available — eliminating repeat sourcing effort.
- **Employee Referral Tracking:** Formal module within the dashboard replacing WhatsApp/email/Sheets tracking. Referrals link directly to candidate profiles.
- **Customizable Hiring Rounds:** Digitizes the 0–5 rating system and cultural fit checklist. Rounds are configurable per role (3–4 rounds with assignment add-ons). HODs/TLs and CXOs submit ratings directly in the portal.
- **Onboarding Automation:** Automated WhatsApp/email reminders to internal teams and candidates before joining dates. E-signature workflow for offer letters and NDAs. AI-assisted document customization based on role and discussion points. Document directory built over Google Drive as a single source of truth.

2 AI Policy Assistant & Knowledge System

- **WhatsApp Policy Chatbot:** A Gemini-powered RAG chatbot that reads all policy documents from Google Drive. Team members — especially BD/Sales — ask questions on WhatsApp (where they already are) about travel, stays, reimbursements, and any policy. Answers are instant and grounded in company policy.
- **Slack Integration for International Team:** Same AI assistant available on Slack for the international team, ensuring no channel fragmentation.
- **Policy Gap Detection:** When a query falls outside existing policy coverage, the system flags it to HR with a recommendation to update policies. Closes the feedback loop between ground-team questions and policy evolution.
- **Anonymous Feedback & Grievance Form:** Integrated feedback mechanism where team members can raise concerns anonymously or visible only to specific HR members. Replaces the current hesitancy in direct communication.

3 Admin Ticketing & Engagement Portal

- **WhatsApp-Native Ticket Ingestion:** An AI agent reads incoming WhatsApp messages from team members and auto-creates tracked tickets. The ground team continues raising issues on WhatsApp — no behavior change required. Complexity is absorbed by the AI layer, not pushed onto employees.

4 Performance Management & L&D System

- **Monthly KPI/KRA Dashboard:** Extends the existing Google Sheets with a dashboard layer. Managers continue updating Sheets — the dashboard provides visibility, analytics, and automated compilation. No data migration required.
- **0–5 Rating Digitization:** Interview and performance ratings move from Sheets to the dashboard. Manager

- **Live Ticket Dashboard:** Real-time visibility of open, closed, and pending tickets. Admin team and CXOs can see status, assignee, and resolution time without digging through WhatsApp threads.
- **Slab-Based Budget Approval Routing:** Digitizes the fixed budget slabs from policy. Requests auto-route to HR, HOD, or CXO based on amount — no more email chains or lost approvals.
- **Employee Engagement Polling:** Saturday team activity polling, confirmation tracking, and idea collection — all within WhatsApp or the dashboard. Replaces ad-hoc WhatsApp group discussions.
- **Field Attendance AI Agent:** Reads WhatsApp location shares from field/temp employees and auto-updates the attendance Google Sheet. No manual transcription. No new app for field staff. Extends the existing WhatsApp behavior they already follow.

→ HR → CXO workflow is automated with notifications and SLA tracking.

- **Incentive Automation:** Performance scores link directly to incentive calculation rules. Probation reviews (3-month) trigger automatically.
- **Skills Matrix Directory:** Centralized "who knows what" directory mapping internal competencies. Identifies training gaps and available expertise.
- **L&D Request Portal & LMS:** Structured training request portal replacing verbal collection. Induction prerequisite assets managed digitally. Training efficacy tracked with standardized assessment forms.

What Remains the Same

- **No New Backend Database:** Google Sheets and Drive remain the core data sources. Zoho People & Payroll remain for on-payroll employees.
- **Sourcing Platforms Stay:** LinkedIn, Naukri, Indeed, Apollo, SalesIQ remain in use — the dashboard connects on top.
- **WhatsApp Stays Primary:** Ground team communication doesn't change. AI agents read and update from WhatsApp directly.

Tech Stack Utilized

- **Frontend:** ReactJS + TypeScript
- **Backend:** Node.js
- **APIs:** Google Sheets, Google Drive, Zoho People, WhatsApp Business, Slack, LinkedIn, Apollo/Naukri
- **AI:** Gemini LLM + LangGraph (agentic workflows for WhatsApp → ticket ingestion, location → attendance update, query → policy answer)
- **Host:** Google Cloud Platform

Key Operational Problems Solved

- Eliminates multi-platform sourcing chaos with a unified ATS layer — no platform switching, no manual scraping.
- Resolves the 10-minute-per-profile screening bottleneck with AI pre-screening against JD parameters.
- Provides live admin ticket visibility and automated slab-based budget approval routing — replacing WhatsApp/email chaos.
- Enables self-serve policy queries via WhatsApp chatbot — freeing HR from repetitive question-answering.
- Automates onboarding reminders, e-signatures, and document directory — replacing manual Google Docs processes.
- Links performance scores to incentive calculations — replacing subjective annual appraisals with data-driven monthly reviews.
- Auto-syncs field attendance from WhatsApp location shares to Google Sheets — no manual transcription, no new app for field staff.

Future Scope of Improvement / Enhancement

- **Vendor Management Module:** A shared module for HR and Accounts to track external vendors. Identified as low priority by the client but planned for future integration.
- **Predictive Attrition Analytics:** An AI layer that reads PMS data, engagement survey results, and attendance patterns to flag flight-risk employees before resignation.
- **AI Recruitment Operations Agent:** An agentic workflow that proactively sources, pre-screens, and shortlists candidates when a new requisition is opened — reducing HR involvement to final review only.

Next Steps for Team Adoption

- **Mandatory Training:** Adoption sessions must be compulsory for all 5 HR team members, with role-specific walkthroughs for each vertical (Hiring, Admin, PMS).
- **Phased Rollout:** Start with the Admin Ticketing module (quickest behavior change — team already on WhatsApp) before introducing the Recruitment Dashboard (largest workflow shift).

- **Feedback Loop:** Establish a continuous feedback mechanism so the solution iterates based on ground-team reality. The AI policy assistant's gap-detection feature creates a natural feedback loop for policy evolution.

SECTION 07 — IMPLEMENTATION PLAN

Phased Roadmap

Initiatives sequenced across three phases, with quantified ROI and scope of work

INITIATIVE		PHASE 1 WEEKS 1–4	PHASE 2 WEEKS 5–9	PHASE 3 WEEKS 10–12
Admin Ticketing & Engagement Portal	Module 3	●		
AI Policy Assistant & Knowledge System	Module 2	●		
Unified Recruitment Dashboard & Onboarding	Module 1		●	
Performance Management & L&D System	Module 4			●

Phase 1 — Admin Visibility & AI Policy Assistant

Weeks 1–4 · Client's Stated #1 Priority

Maturity 1.6 → 2.4

SCOPE OF WORK & DEPENDENCIES

- **Build:** WhatsApp-native ticket ingestion AI agent (LangGraph) that reads messages and auto-creates tracked tickets on Google Sheets.
- **Build:** Live ticket dashboard with open/closed/pending visibility and slab-based budget approval routing.
- **Build:** Gemini-powered RAG policy chatbot on WhatsApp Business API, reading policy docs from Google Drive. Slack integration for international team.
- **Build:** Field attendance AI agent — reads WhatsApp location shares, auto-updates attendance Sheets.
- **Tech Stack & Badges:** Gemini LLM LangGraph WhatsApp API Slack API React.js .
- **Client To-Do:** Provide policy documents organized on Drive, confirm budget approval slabs, share WhatsApp group access for API testing.

100%

TICKET VISIBILITY

All admin tickets tracked live — no more WhatsApp chaos.

Zero

HR INTERRUPTIONS

Policy queries answered by AI chatbot instantly.

Auto

FIELD ATTENDANCE

WhatsApp locations sync to Sheets — no manual entry.

Phase 2 — Unified Recruitment & Onboarding Engine

Weeks 5–9 · Largest Operational Impact

Maturity 2.4 → 3.0

SCOPE OF WORK & DEPENDENCIES

- **Build:** Centralized ATS dashboard connecting LinkedIn, Naukri, Indeed, Apollo, and SalesIQ via APIs. Unified candidate pipeline from sourcing to joining.
- **Build:** AI pre-screening agent (Gemini) that matches profiles against JD parameters and prerequisite questions. Replaces manual 10-min-per-profile screening.
- **Build:** Candidate re-engagement database — indexes previously screened candidates for future similar roles. Employee referral tracking module.
- **Build:** Onboarding automation — automated reminders (WhatsApp/email), e-signature workflow for offer letters/NDAs, AI document customization, document directory over Google Drive.
- **Tech Stack & Badges:** React.js + TS Node.js Sourcing APIs Gemini LLM .

- **Client To-Do:** Provide API access to sourcing platforms, share historical candidate database from Sheets, confirm e-signature vendor preference, provide onboarding process documentation.

↓ 50%+ SCREENING TIME AI pre-screening replaces manual 10-min reviews.	Unified PIPELINE VISIBILITY 6+ platforms tracked in one dashboard — CXO visibility.	Auto ONBOARDING Reminders, e-signatures, and document directory automated.
---	--	---

Phase 3 — Performance Management & L&D System

Weeks 10–12 · Strategic Talent Development

Maturity 3.0 → 3.4

SCOPE OF WORK & DEPENDENCIES

- **Build:** Monthly KPI/KRA dashboard extending existing Google Sheets. Manager → HR → CXO workflow automation with notifications and SLA tracking.
- **Build:** 0–5 rating digitization for interviews and performance. Incentive calculation automation linked to performance scores. Probation review auto-trigger at 3 months.
- **Build:** Skills matrix directory ("who knows what"). L&D request portal replacing verbal collection. Saturday activity polling module.
- **Tech Stack & Badges:** **React.js + TS** **Node.js** **Google Sheets API** **Gemini Analytics** .
- **Client To-Do:** Provide current KPI/KRA Sheets structure, confirm incentive calculation rules, map skills taxonomy, provide induction training assets.

Monthly DATA-DRIVEN PMS Replaces subjective annual appraisals with monthly metrics.	Auto INCENTIVE CALC. Performance scores link directly to incentive rules.	Mapped SKILLS MATRIX Training gaps identified; L&D requests structured.
--	--	--

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED**CIN : U62099RJ2025OPC100267****SECTION 08 — RETURN ON INVESTMENT (ROI)**

System Impact: Before & After

Measurable improvements post-implementation

CATEGORY	BEFORE (CURRENT STATE)	AFTER (POST-IMPLEMENTATION)
Recruitment Pipeline	6+ disconnected platforms. Manual Google Sheets tracking. 30–45 day closing rate. 10 min per profile screening.	Unified ATS Dashboard. All platforms connected via API. AI pre-screening reduces manual review by 50%+. Candidate re-engagement database for unclosed roles.
Admin Ticket Tracking	WhatsApp/email with zero live tracking. Budget approvals lost in email threads. No slab-based routing despite defined slabs.	Live Ticket Dashboard. WhatsApp-native AI ingestion. 100% visibility of open/closed/pending. Automated slab-based budget approval routing.
Policy Query Management	All queries routed to HR directly. No self-serve. No knowledge base. Repetitive questions consume HR bandwidth.	AI Policy Chatbot. WhatsApp + Slack self-serve. Instant answers grounded in policy docs. Gap detection recommends policy updates to HR.
Onboarding & Documents	Manual Google Docs process. No e-signature. No document directory. No automated reminders to teams or candidates.	Automated Onboarding Engine. WhatsApp/email reminders. E-signature workflow. AI document customization. Single source of truth document directory.
Performance Management	Google Sheets KPI/KRA. Annual subjective appraisals. No incentive automation. Decoupled from operational data.	Monthly Data-Driven PMS. Dashboard extends Sheets. 0–5 ratings digitized. Auto incentive calculation. Probation reviews auto-triggered.
Field Attendance	Previous software failed. WhatsApp locations manually transcribed to Sheets. No live dashboard. Temp employees excluded from Zoho.	AI Attendance Agent. Reads WhatsApp location shares, auto-updates Sheets. No new app for field staff. No manual transcription.
L&D & Skills Tracking	Training needs collected verbally. No skills matrix. No request portal. No polling for engagement activities.	Structured L&D Portal. Digital request portal. Skills matrix directory. Saturday activity polling. LMS for induction assets.
Department Maturity Score	1.6 / 5.0 (Ad-hoc)	3.4 / 5.0 (Systematised)

Quantified Executive Time Savings

Estimated annual bandwidth reclaimed for the HR & Talent Management Lead (Dolly Mehta / HR Manager & team) by automating candidate screening, policy Q&A, and admin ticket routing.

> 50% SCREENING TIME SAVED	100% POLICY Q&A AUTOMATED	35 hrs MONTHLY TIME SAVED	420 hrs ANNUAL HOURS SAVED
---	-------------------------------------	-------------------------------------	--------------------------------------

Bandwidth Reinvestment Breakdown:

- **Current Friction:** HR team spends ~10 minutes per candidate profile screening resumes across 6 platforms, manually routing WhatsApp admin tickets, and repeatedly answering basic policy questions.
- **Automated Efficiency:** AI Resume Pre-Screening Agent cuts screening time in half, while WhatsApp AI Policy Chatbot and Live Ticket Dashboard automate self-serve Q&A and ticket approvals.
- **Strategic Impact:** Reclaims **420 HR hours per year (~52.5 full working days)** to focus on proactive talent acquisition, leadership hiring, employee retention, and PMS appraisal cycles.
