Department Wise Audit Report

Ankit Jain (CBDO)

Institutional, B2B, Government & Export Business Development

An independent operational review of the CBDO, assessing pipeline visibility, sales execution infrastructure across five distinct verticals, and cross-departmental coordination, prepared as part of the EF Polymer Private Limited organization-wide operational audit by Creative Upaay (brand owned by Cinnovate Solutions (OPC) Private Limited).

CLIENT	EF Polymer Private Limited
PREPARED BY	Creative Upaay
DOCUMENT VERSION	1.0
DATE ISSUED	18th July 2026
REVIEW SCOPE	CBDO Operations

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 01 — EXECUTIVE SUMMARY

Report Overview

The CBDO manages strategic growth across 4 legacy domestic verticals (Seed, B2B/Company, NGO/CSR, Government) and 1 New Business vertical (Cocopeat & Japan Exports). The team is highly specialized, driving sophisticated institutional sales cycles.

However, the audit reveals critical operational vulnerabilities: the complete absence of a central CRM, siloed product/vertical knowledge leading to prolonged training times, and manual travel approvals that delay field execution. Active deal pipelines and client histories are siloed within the personal WhatsApp accounts of individual executives. The CBDO relies on manual meetings, retrospective monthly reports, and email approval trails to coordinate with Finance. Implementing a custom unified CRM (with direct WhatsApp API lead insertion), a digital product knowledge hub (leveraging the Creative Upaay chatbot), and multichannel approval bots (Slack/WhatsApp) feeding a live CXO Level Dashboard is the urgent priority to secure data, accelerate adoption, and streamline field operations.

No Realtime SALES DATA & VISIBILITY	4 + 1 BD VERTICALS	Manual LIVE PIPELINE CHECKS	1.3 / 5.0 OVERALL MATURITY SCORE
---	------------------------------	---------------------------------------	--

About the Maturity Score

A 1–5 scale measuring how systematised, documented, and independently operable the department is. Scored across five dimensions: Process, Technology, Data Quality, Documentation & Knowledge Management.

1 — Ad hoc   5 — Optimised

■ **1.3** Current state ■ **3.0** Post-roadmap target ○ **5.0** Best-in-class benchmark

Brand owned by

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

SECTION 02 — DEPARTMENT MATURITY ASSESSMENT

Department Maturity Assessment

Solid line: current state. Dashed line: target state (post-roadmap).

CBDO scores 1.3 overall — Critically low scores in Technology and Data Quality stem from the total lack of a centralized CRM system. Sales operations are highly informal and dependent on executive memory and un-auditable WhatsApp threads.

Successfully executing Phase 2 (CRM Rollout) will yield an immediate and massive uplift in data fidelity and executive oversight.

DIMENSION	CURRENT	TARGET	GAP
Process Standardization	1.5	3.0	1.5
Technology Utilization	1.0	3.5	2.5
Data Quality & Accessibility	1.0	3.5	2.5
Documentation	2.0	3.0	1.0
Knowledge Management	1.0	2.0	1.0
Overall	1.3	3.0	1.7

SECTION 03 — CURRENT WORKFLOWS & PROCESS MAPS

Current Workflows

Organizational Structure & Verticals

What needs to be fixed: The CBDO office manages two distinct divisions: legacy domestic sales and new business/exports. Because these divisions operate with disjointed tracking, corporate oversight is severely fragmented.

Detailed Structure:

- **Legacy Domestic BD:** Comprises Seed/Contract Farming (Sameer), B2B - SeaGreen & RCM (Jatin), NGO/CSR (Vikas), and Government Sales (Shailendra).
- **New BD & Exports:** Focuses on Cocopeat (Mohit & Aishwarya) and B2B Japan Exports (Yoshida-san).

Decentralized Lead Generation Strategy

What needs to be fixed: Centralized lead generation failed due to distinct vertical-specific buyer personas. However, the current decentralized model operates with zero shared intelligence, risking parallel or conflicting approaches.

Detailed Workflow Steps:

1. **Decentralization:** Each of the 4 domestic verticals owns its lead generation strategy independently.
2. **Dedicated Agents:** BD executives focus exclusively on vertical-specific pitching and sourcing.
3. **Coordination:** The CBDO facilitates periodic info-sharing meetings to align targets and prevent cross-vertical lead collision.

Lead Tracking Bottleneck — P-01 P-03

What needs to be fixed: Because deals are tracked entirely in personal apps, the CBDO cannot intervene to rescue stalled deals until they appear dead on a month-end report.

Detailed Workflow Steps:

1. **Lead Generation:** Leads are acquired via regional networks, dealer channels, or direct inquiry.
2. **Information Silo:** Deal details, client correspondence, and stage status are stored exclusively in executives' personal WhatsApp chats.
3. **Manual Reconciliation:** The CBDO must hold intensive 1:1 meetings with each BD executive to manually audit pipeline

stages.

4. **Retrospective View:** A static, retrospective spreadsheet report is compiled and submitted at the end of each month.

Vertical Tracking Disparity — P-04

What needs to be fixed: The disparity in basic data-entry discipline creates friction when attempting to synthesize a holistic company-wide pipeline view for the CBDO.

Detailed Workflow Steps:

- 1. **Cocopeat Division:** Utilizes a basic Excel spreadsheet tracker for pipeline stages.
- 2. **Legacy BD Divisions:** Seed, B2B, NGO, and Govt verticals have no formal pipeline tracking.
- 3. **Friction:** Cross-vertical synthesis is impossible because of incompatible tracking formats.
- 4. **Review Limitation:** CBDO pipeline reviews remain qualitative, ad hoc, and inconsistent.

CINNOVATE SOLUTIONS (OPC) PRIVATE LIMITED

CIN : U62099RJ2025OPC100267

Cross-Department Dependencies

Finance & Accounts

SALES-TO-FINANCE DATA SYNC & TRAVEL WORKFLOW

OPERATIONS DEPENDENCY

Finance must stop manual reconciliation of invoicing and payment records. The BD team needs Zoho Books billing, receivables, and payment confirmations to sync automatically into the central CRM. Furthermore, Finance must connect with the new multichannel travel approval bot to handle immediate reimbursement payouts upon CBDO/vertical head approval.

 **Key Person: Shobha Shekhawat (Finance Head)**

CRITICAL BOTTLENECK

Without automated payment sync and multichannel travel approval flows, BD executives must manually query Finance to verify payment status before dispatches, and travel payouts face long delays due to manual email trails.

DATA TRANSFER & UPDATES NEEDED

Configure automated Zoho Books-to-CRM API feeds to update customer account credit limits, payment history, and outstanding invoices, and establish Slack/WhatsApp automated webhook triggers for travel and reimbursement approvals.

Technical & Field Operations

PRODUCT TESTING & FIELD ISSUES SLA

OPERATIONS DEPENDENCY

The BD team frequently encounters crop-specific field issues (e.g., product performance complaints, software-related queries from farmers) and depends on the Technical team for resolution. Additionally, the BD team needs live visibility into which product formulations have completed testing and are ready for commercial sale.

 **Key Person: Ritu Panwar (R&D Lead)**

CRITICAL BOTTLENECK

Lack of visibility into testing completion leads to the risk of BD executives pitching unvalidated formulations, and unresolved field complaints persist for weeks, severely damaging distributor and client trust.

DATA TRANSFER & UPDATES NEEDED

The Technical team must publish a live product testing register and formulation roadmap inside the CRM, and establish a formal field-issue escalation SLA (e.g., 24-hour triage, 72-hour resolution) integrated with deal records.

HR & Talent

CRM ADOPTION & SALES PERFORMANCE METRICS

OPERATIONS DEPENDENCY

HR must support the rollout of the central CRM and knowledge hub by designing mandatory adoption programs, compiling vertical-specific product training assets, and integrating CRM data-entry compliance and pipeline hygiene metrics directly into the sales

CRITICAL BOTTLENECK

Legacy BD team members show strong resistance to transitioning from WhatsApp to structured database entries. Without HR-driven training and PMS alignment, CRM adoption will fail, leaving lead data siloed.

team's Performance Management System (PMS).

Key Person: Dolly Mehta (HR Manager)

DATA TRANSFER & UPDATES NEEDED

HR must develop standard CRM training paths, update job descriptions to include pipeline tracking responsibilities, and link monthly/quarterly incentives to CRM pipeline hygiene metrics.

SECTION 04 — OPERATIONAL PAIN POINTS & BOTTLENECKS

Operational Pain Points

Priority Focus Areas:

- ① **CRM Absence & Lead Leakage** — No central CRM exists. Lead status and ownership are invisible at the executive level, risking data loss during turnover.
- ② **Retrospective-Only Reporting** — Pipeline reporting happens retrospectively once a month, preventing real-time CBDO intervention.
- ③ **Legacy Team Resistance & Onboarding Gaps** — Legacy staff resist new tracking workflows, while the lack of a centralized product/vertical repository extends training timelines.
- ④ **Manual Travel Approvals** — Manual tracking of travel plans and reimbursement requests across Finance and vertical heads delays field operations and lacks executive visibility.

	PAIN POINT	IMPACT	EVIDENCE FROM AUDIT
P-01	Absence of Central CRM. Lead status and ownership are invisible at the executive level.	CRITICAL	Requires manual meetings to determine account owners; risks massive lead leakage if personnel transition.
P-02	Retrospective Monthly Reporting. Pipeline reporting is only conducted retrospectively once a month.	HIGH	Prevents timely CBDO intervention on stalled deals; obscures live revenue forecasting.
P-03	Siloed WhatsApp Communications. Customer interactions live exclusively inside employees' personal WhatsApp accounts.	HIGH	No central capture of client history or frequency of touchpoints.
P-04	Process Disparities. Cocopeat uses a basic tracker, while the 4 legacy domestic verticals have no formal logging.	MEDIUM	Inconsistent tracking discipline across the department creates friction during cross-vertical reporting.
P-05	Legacy Team Resistance to Tech Adoption. The old/legacy BD team exhibits massive behavioral resistance to adopting new tools, tracking systems, or structured data-entry workflows.	CRITICAL	Without a dedicated change-management strategy and structured training, the CRM rollout will face active pushback, risking adoption failure.
P-06	No Centralized Product & Vertical Knowledge Hub. Absence of a centralized data knowledge hub containing comprehensive product specs and vertical-specific use cases.	HIGH	New or legacy team onboarding/training about specific product formulations and business verticals takes excessive time, slowing down CRM and operational tech adoption.
P-07	Manual Travel & Reimbursement Approvals. Tracking and coordinating travel plans and reimbursement request approvals manually across vertical heads and Finance.	HIGH	No central visibility for CXO approvals; reimbursement processes are delayed due to unstructured email/chat approvals without a single dashboard view.

SECTION 05 — TIME & EFFORT ALLOCATION

Time & Effort Allocation

Estimated breakdown of weekly bandwidth based on workflow analysis

ACTIVITY	SHARE OF CBDO TIME	EST. TIME / DAY
Coordinating with BD Vertical Heads	~25%	~2.0 hrs
Individual Travel Time (Key Partners & Client Visits)	~20%	~1.6 hrs
CXOs & Investor Meetings	~15%	~1.2 hrs
Executive Pipeline Review & Meetings	~15%	~1.2 hrs
Cross-Department & Operations Coordination	~15%	~1.2 hrs
Travel Plan Verification & Activity Audits	~10%	~0.8 hrs

Based on a standard 8-hour workday. Hours shown are estimates per the CBDO's daily allocation, averaged across a typical week.

SECTION 06 — RECOMMENDED SOLUTION

Recommended Solution

This section outlines the integrated technology solution proposed to resolve operational bottlenecks, replacing the legacy recommendations register.

Implementation Required

Solution Modules to be Built:

1 Custom Unified CRM & Lead Ownership

- **Custom CRM Build:** Build a custom unified CRM tailored for all 5 verticals (Seed, B2B, NGO, Govt, Cocopeat) as per their specific working style and data-capture needs.
- **WhatsApp API Lead Insertion:** Connect the custom CRM directly with the WhatsApp API to allow executives to manually insert new leads and updates via WhatsApp directly.
- **Vertical Autonomy:** Set up distinct layout views and custom pipelines for each vertical to ensure smooth workflow adoption without cross-vertical clutter.

2 Live CXO Level Dashboard

- **Real-Time Pipeline View:** Shift from manual monthly retrospective reviews to a live CXO Level Dashboard monitoring pipeline health daily.
- **Stalled Deal Alerts:** Automated alerts flag any deal with no activity for 7+ days directly on the CXO Dashboard.
- **Conversion Analytics:** Track deal velocity, conversion ratios, and cross-vertical benchmarking in real time.
- **Lead Approached vs. Converted:** Daily count of leads approached and leads converted, visible on the CXO Level Dashboard for immediate performance monitoring.

3 Cross-Vertical Standardization

- **Unified Tracker Framework:** Deploy the Cocopeat vertical's Excel tracking framework across all 4 legacy domestic verticals with unified column definitions as a stop-gap before CRM launch.
- **Standardized Pipeline Stages:** Define uniform stage labels (Prospect, Qualified, Proposal, Negotiation, Closed) to align cross-vertical reporting and build data-entry discipline.

4 Central Product & CRM Knowledge Hub

- **Single Source of Truth:** Digital repository containing crop specs, product formulas, and vertical personas. Leverages the existing 60-70% built AI chatbot developed by Creative Upaay.
- **Adoption is the Challenge:** Since the knowledge layer is largely built, the primary roadblock is team adoption. Standard workflows must mandate querying the bot.
- **CRM SOP playbooks:** Incorporate interactive data-entry guidelines and chatbot queries into training materials to accelerate onboarding.

5 Multichannel CXO Approvals & Travel Bot

- **Unified Approval Feed:** Consolidated dashboard section displaying all pending travel plans, client meeting schedules, and expense reimbursement requests from the BD team.
- **Multichannel Actions:** Integrates Slack and WhatsApp bots, allowing vertical heads and the CBDO to review and click-to-approve requests instantly on-the-go.
- **Auto-Logging & Sync:** Approved travel logs update executive schedules automatically (without daily manual planning approval needed).
- **Direct Finance Routing:** Click-to-approve actions automatically trigger payment/booking notifications straight to Shobha Shekhawat (Finance) for instant disbursement.

What Remains the Same

- **Sales Methodology:** The BD team's relationship-driven approach remains unchanged; the custom CRM digital tool supports rather than replaces it.
- **Vertical Autonomy:** Each vertical retains its operational independence within the custom CRM framework.

Tech Stack Utilized

- **CRM:** Custom Unified CRM (React + Python/Node)
- **Dashboard:** ReactJS + TypeScript (CXO Dashboard)
- **Integration:** WhatsApp API (Manual Lead Insertion), Slack API, Zoho Books API
- **Knowledge Layer:** Creative Upaay AI Chatbot (60-70% built) / Central Wiki

Key Operational Problems Solved

- Eliminates lead leakage risk during employee turnover by securing corporate ownership of all contact data.
- Replaces monthly retrospective reviews with live pipeline visibility on a CXO Level Dashboard.
- Enables manual lead insertion directly via WhatsApp, saving time and keeping communications aligned.
- Standardizes tracking discipline across all 5 BD verticals, eliminating cross-vertical reporting friction.
- Provides daily travel plan visibility and lead approach-vs-conversion metrics for immediate executive oversight.
- Tackles team training and tech adoption by leveraging the 60-70% built Creative Upaay AI chatbot as a product and CRM knowledge hub.
- Eliminates manual delays in travel and expense approvals via instant Slack/WhatsApp direct approvals.
- Automates flight approval routing through CBDO → Accounts, while daily travel plans remain auto-logged without approval.

Future Scope of Improvement / Enhancement

- **AI Deal Scoring:** In the future, an AI model could analyze CRM data to score deal health, predict win probability, and recommend next-best-actions for each BD executive. This is not needed right now but is a planned future enhancement.

Next Steps for Team Adoption

- **Mandatory CRM & Product Chatbot Training:** All BD executives must undergo compulsory training focusing on product vertical knowledge and CRM usage, actively querying the 60-70% built Creative Upaay AI chatbot.
- **Feedback Loop:** Establish weekly 15-minute pipeline stand-ups to instill data-entry discipline and iterate on the custom CRM workflow design based on ground feedback.
- **Change Management & Tech Adoption Focus:** The CBDO will actively enforce CRM compliance. Since adoption is the main challenge (**P-05**), top-down enforcement (incentives linked to CRM and chatbot queries) is critical for success.

SECTION 07 — PHASED ROADMAP

Phased Roadmap

Initiatives sequenced across three phases, with quantified ROI and scope of work

INITIATIVE		PHASE 1 2–3 WKS	PHASE 2 4–6 WKS	PHASE 3 6–8 WKS
Cross-Vertical Standardization	Module 3	●		
Product & Vertical Knowledge Hub (Creative Upaay Chatbot)	Module 4	●	●	
Custom Unified CRM Build	Module 1		●	
Multichannel Approvals Bot	Module 5		●	●
Live CXO Level Dashboard	Module 2			●

Phase 1 — Stop-Gap Discipline & Training Prep

Duration: 2–3 Weeks · Low effort · High Training Value

Maturity 1.3 → 1.6

SCOPE OF WORK & DEPENDENCIES

- **Build:** Adapt the Cocopeat vertical's Excel tracking framework with unified column definitions for all 4 legacy verticals.
- **Build:** Define standardized pipeline stage labels (Prospect, Qualified, Proposal, Negotiation, Closed) to align cross-vertical reporting.
- **Build (Knowledge Hub Prep):** Collate product specs and vertical personas to expand the 60-70% built Creative Upaay product knowledge chatbot (**P-06**).
- **Tech Stack & Badges:** **Google Sheets API** **Cocopeat Tracker Template** .
- **Team Adoption:** Conduct CBDO-led weekly 15-minute pipeline stand-ups to instill data-entry discipline before CRM launch.
- **Team Training & Tech Adoption Training:** Initiate chatbot querying and basic data-hygiene workshops to tackle adoption barriers for legacy team members (**P-05**).
- **Change Management (Legacy Pushback):** The CBDO must enforce mandatory data entry compliance from day one. The legacy BD team exhibits strong resistance to even Google Sheets (**P-05**), so a top-down mandate with clear consequences for non-compliance is critical.
- **Client To-Do:** Mandate end-of-week data entry into the shared tracker as a prerequisite for the monthly CBDO review.

Uniform REPORTING FORMAT

Across all 5 BD units — Seed, B2B, NGO,
Govt, Cocopeat

Repurposing EXISTING TECHNOLOGY

Repurposing existing proven Cocopeat Excel
tracker

↓ 3 hrs WEEKLY SYNC PREP

Standardized Excel trackers reduce sync
prep time

Phase 2 — Core Infrastructure & Knowledge Layer

Duration: 4–6 Weeks · High effort · Critical Foundation

Maturity 1.6 → 2.5

SCOPE OF WORK & DEPENDENCIES

- **Build:** Build and launch the Custom Unified CRM with vertical-specific fields and workflows tailored to each of the 5 business units.

- **Build (Knowledge Hub):** Deploy the centralized Product & CRM Knowledge Hub, integrating the 60-70% built Creative Upaay AI chatbot and uploading SOP playbooks (**P-06**).
- **Build (Travel Bot):** Launch the Multichannel Approval Bot on Slack and WhatsApp, linking travel approvals directly to Finance Zoho Books disbursements (**P-07**).
- **Build:** Migrate all legacy client lists into the custom CRM, configuring WhatsApp API hooks to support manual lead insertion.
- **Tech Stack & Badges:** **Custom CRM** **WhatsApp API** **Slack API** **Creative Upaay Chatbot** .
- **Team Adoption:** Run vertical-specific CRM and chatbot training sessions, focusing on overcoming adoption challenges; mandate travel Bot routing.
- **Client To-Do:** Assign development resources to build the custom CRM interfaces and procure WhatsApp Business API numbers.

0%

DATA LEAKAGE

Securing corporate ownership of all B2B leads and contacts

Instant

TRAVEL APPROVALS

WhatsApp/Slack bot cuts routing delays to zero

5 → 1

UNIFIED DATABASE

All 5 verticals now share one CRM system

Phase 3 — Strategic Scaling & Automation

Duration: 6–8 Weeks · Medium effort

Maturity 2.5 → 3.0

SCOPE OF WORK & DEPENDENCIES

- **Build:** Configure live CXO Level Dashboards reflecting live pipeline statuses, conversion ratios, and deal velocity.
- **Build:** Build automated alerts for stalled deals — flag any deal with no activity for 7+ days to the CBDO directly.
- **Build (CXO Approval View):** Implement the consolidated approvals dashboard section for travel plans and reimbursement requests (**P-07**).
- **Tech Stack & Badges:** **React.js + TS Dashboard** **Gemini / LLM Deal Scoring** .
- **Team Adoption:** Transition the monthly retrospective reviews into live pipeline triage sessions led by the CBDO. Move all travel & reimbursement approvals strictly to Slack/WhatsApp bot clicks.
- **Client To-Do:** Implement quarterly pipeline health reviews with cross-vertical benchmarking and conversion rate analysis.

ROI Impact: Before & After

Measurable improvements post-implementation, mapped to each identified priority

CATEGORY	BEFORE (CURRENT STATE)	AFTER (POST-IMPLEMENTATION)
Lead Ownership & CRM	No central CRM. Lead status invisible at executive level. Data in personal WhatsApps.	Custom Unified CRM. 100% lead ownership visibility with 0% data leakage risk via manual WhatsApp lead insertion.
Pipeline Reporting	Retrospective monthly reviews. CBDO cannot intervene on stalled deals in real time.	Live CXO Level Dashboard. Real-time pipeline status with 7-day stall alerts.
Client Communication	Siloed WhatsApp communications. No central capture of client history or touchpoints.	Custom CRM Logging. Every interaction logged and new leads inserted directly via WhatsApp.
Cross-Vertical Tracking	Inconsistent tracking across 5 verticals. Only Cocopeat uses a basic tracker.	Standardized Pipeline Stages. Uniform reporting format across all BD units.
Product & Vertical Knowledge	Information scattered across documents and personal folders. Team onboarding and training take weeks.	Centralized Knowledge Hub. Creative Upaay chatbot (60–70% built) adopted fully by the team. Onboarding time reduced by 60%.
Travel & Expense Approvals	Manual email and chat approval trails across vertical heads and Finance, causing payout delays.	Multichannel Bot Approvals. Approved instantly via Slack/WhatsApp bot and tracked on CXO Dashboard.
Department Maturity Score	1.3 / 5.0 (Ad-hoc)	3.0 / 5.0 (Systematised)

Quantified Executive Time Savings

Estimated annual bandwidth reclaimed for the CBDO by eliminating manual pipeline reconciliation and approval routing across 5 BD verticals.

5 BD VERTICALS UNIFIED	9 hrs WEEKLY RECLAIMED TIME	36 hrs MONTHLY TIME SAVED	432 hrs ANNUAL HOURS SAVED
----------------------------------	---------------------------------------	-------------------------------------	--------------------------------------

Bandwidth Reinvestment Breakdown:

- Current Friction:** CBDO spends ~2.0 hrs/day (~10 hrs weekly) coordinating with 5 BD vertical heads, and ~0.8 hrs/day (~4 hrs weekly) auditing and approving travel/expenses manually.
- Automated Efficiency:** Custom CRM, live CXO Level Dashboard, and Slack/WhatsApp approval bots automate pipeline syncs and expense routing.

- **Strategic Reinvestment:** Reclaims **432 hours annually (~54 full working days)** to invest in high-level CXO/Investor meetings (~1.2 hrs/day) and strategic key partnership closures.
